

MISSOURI
AIR CONSERVATION COMMISSION
BRIEFING DOCUMENT

December 9, 2004

MISSOURI DEPARTMENT
OF NATURAL RESOURCES

Air and Land Protection Division

Air Pollution Control Program

NOTICE OF OPEN MEETING

Persons with disabilities requiring special services or accommodations to attend the meeting can make arrangements by calling the Air Pollution Control Program directly at (573) 751-4817, the division's toll-free number at 1-800-361-4827, or by writing two weeks in advance of the meeting to: DNR, Air Conservation Commission Secretary, P. O. Box 176, Jefferson City, MO 65102. Hearing impaired persons may contact the program through Relay Missouri, 1-800-735-2966. Please visit our web site at www.dnr.mo.gov.

AGENDA

Missouri Air Conservation Commission Meeting
Governor Office Building
Room 450
200 Madison Street
Jefferson City, MO 65101
December 9, 2004
9:00 a.m.

| Missouri State Implementation Plan – Maintenance Plan for the Missouri Portion of the St. Louis Ozone Non-Attainment Area Including On-Road Motor Vehicle Emission Budgets | 77 | Ron Jeffries |
|---|----|--------------|

The Missouri Department of Natural Resources is proposing to establish mobile source emission budgets for conformity purposes for the St. Louis ozone non-attainment area. Although the 2007 emissions budgets were not formally established as a motor vehicle budget in the 1-hour ozone maintenance plan, the 2007 emissions budgets were included in the maintenance plan as emissions estimates for projected emissions inventories for that year. The mobile source emission budgets establish a cap on emissions that cannot be exceeded by predicted highway and transit vehicle emissions. The department has worked with the East-West Gateway Council of Governments Interagency Consultation Group in establishing the year 2007 mobile source budgets.

|-----------------------------|----|------------|

I. Open Session

This segment of the meeting affords citizens an opportunity to voice concerns to the commission on air quality issues. Please be advised, comments on specific rulemakings need to be provided as testimony, under oath, during the formal process of the public hearing for that rulemaking.

J. Future Meeting Dates

February 3, 2005 – Jefferson City

Harry S Truman Building
Room 490
301 W. High Street
Jefferson City, MO 65101

March 31, 2005 – St. Joseph

Stoney Creek Inn
Salon A
1201 North Woodbine Road
St. Joseph, MO 64506

April 28, 2005 – Jefferson City

Harry S Truman Building
Room 490
301 W. High Street
Jefferson City, MO 65101

May 26, 2005 – St. Louis

Meeting Room Pending

June 30, 2005 – Jefferson City

Governor Office Building
Room 450
200 Madison Street
Jefferson City, MO 65101

July 21, 2005 – Poplar Bluff

Meeting Room Pending

August 25, 2005 – Jefferson City

Governor Office Building
Room 450
200 Madison Street
Jefferson City, MO 65101

September 29, 2005 – Kansas City
Meeting Room Pending

October 27, 2005 – Jefferson City
Governor Office Building
Room 450
200 Madison Street
Jefferson City, MO 65101

December 8, 2005 – Springfield
Meeting Room Pending

K. Discussion of Pending Litigation and Legal Matters

Tim Duggan

(This portion of the meeting may be closed, pursuant to
Section 610.021 (1), RSMo, after a vote by the
Commission.)

L. Meeting Adjournment

Joanne Collins

MINUTES
MISSOURI AIR CONSERVATION COMMISSION
Truman State University
Room 310 – Governors Room
100 East Normal
Kirksville, MO 63501
October 28, 2004
9:00 a.m.

Commissioners Present

Jack C. Baker, Member
Harriet Beard, Member
Ernie Brown, Member
Joanne Collins, Chairman
Michael Foresman, Vice Chairman
Carolyn Pufalt, Member

Staff Members Present

Irene Crawford, Regional Director, Northeast Regional Office
Tim Duggan, Attorney General's Office
Steve Feeler, Compliance/Enforcement Section Chief, Air Pollution Control Program (APCP)
David Gilmore, Commission Secretary, APCP
Wayne Graf, Operations Section, APCP
Haskins Hobson, I/M Section, APCP
Ron Jeffries, Operations Section, APCP
Jim Kavanaugh, Operations Section Chief, APCP
Paul McConnell, Operations Section, APCP
Sarah McMichael, Public Information Specialist, APCP
Kyra Moore, Permits Section Chief, APCP
Gus Ralston, Kansas City Regional Office
Missy Seeligman, Program Secretary, APCP
Leanne Tippet Mosby, Director, APCP

Others Present by Attendance Record

Amy Algoe-Eakin, U.S. Environmental Protection Agency (EPA) Region VII
Robert Brundage, Newman Comley & Ruth
Lee Daniels, U.S. EPA Region VII
Dave Fraley, City Utilities of Springfield
Sallie Keeney, REG Form
Steve Rudloff, Missouri Limestone Producers Association
Tom Siedhoff, Mississippi Lime
Terry Spence, Citizen
Melody Torrey, Citizen

A. Call to Order

Chairman Joanne Collins called the October 28, 2004, meeting of the Missouri Air Conservation Commission to order. The commissioners introduced themselves.

B. Minutes, October 28, 2004, Meeting

Commissioner Michael Forseman moved to approve the minutes as written. Commissioner Caroline Pufalt seconded; Chairman Collins requested that a sentence be added to include information about Norella Huggins, member of the Hazardous Waste Commission, serving as chair of the Commissioners Core Workgroup. Tim Duggan, Attorney General's Office Representative, was lead person for staffing the workgroup in that area. All commissioners voted to approve the minutes to include corrections and additions.

C. Reports - The following referenced reports are in the October 28, 2004, Missouri Air Conservation Commission Briefing Document.

1) COMPLIANCE/ENFORCEMENT

Steve Feeler referred the commission to the Complaint Report beginning on Page 23. The department received 125 complaints during the month of September.

Mr. Feeler noted that the department received 22 Premium Standard Farm (PSF) complaints were received during the month of September, two of which were related to the packing plant in Milan and the others were related to the various farms located around the northern part of the state.

Commissioner Foresman inquired about the statement located at the bottom of Page 35 regarding Royal Oak Enterprises' 16 kilns and whether the statement referred to that facility or all of Royal Oak Enterprises' facilities.

Mr. Feeler clarified the statement as pertaining to Royal Oak Enterprises' remaining facilities.

Mr. Feeler next referred the commission to the Settlement Report on Page 45. For 2004, the program has resolved 245 cases totaling approximately \$475,000 in penalties paid and approximately \$490,000 in suspended penalties. Mr. Feeler also noted that the program has about 30 active cases at the Attorney General's Office that have been referred for legal action. The majority of those cases will end up being resolved through negotiations with very few cases actually ending up in court.

Commissioner Foresman questioned why Lakeside Shopping Center, LLC had higher resolved penalties than most of the other cases.

Mr. Feeler explained the reason that the penalties were higher than most was due to the significance of the violation. The developer demolished nine or eleven structures in Independence, Jackson County, Missouri without inspecting for the presence of asbestos, without removing asbestos properly, and without notifying the department.

2) PERMITS

Kyra Moore referred the commission to the permit reports beginning on Page 53 with the Permit Applications Received Report. For the month of September, the program received 51 construction permit projects and 27 operating permit projects.

The Permit Applications Completed Report begins on Page 63. For September, the program completed 59 construction permit projects and 39 operating permit projects.

The Operating Permit Progress Report begins on Page 75. No Operating Permits are currently on public notice though several will probably be on public notice within the next week.

The Fort Leonard Wood (FLW) operating permit was on public notice in August. During this public notice process, a request for a public hearing in St. Louis was received from The Great Rivers Environmental Law Center on behalf of The Coalition for the Environment. The program held a hearing on October 20, 2004, in St. Louis with approximately twelve people attending and two people giving oral testimony. In addition to that hearing, there will be another hearing at FLW on Monday, November 1, 2004 in Waynesville, Missouri at the Parker Fine Arts Building at 7:00 p.m. After the hearing, comments received from both hearings and the public notice period will be responded to in writing and the final permit issued. The final permit will be sent to EPA for their review prior to the issuance of the permit.

Commissioner Harriet Beard inquired as to how the hearing went in St. Louis.

Ms. Moore commented that the hearing went well. Two people spoke at the hearing and written comments were submitted by those who could not attend or by those who did not make it to the hearing on time.

The program is finalizing the City Utilities of Springfield coal-fired boiler permit. The permit and response to comments will be issued later today and copies will be available at the Air Pollution Control Program office, the Southwest Regional Office and on the Air Pollution Control Program's Web site.

The Aquila simple cycle turbine plant permit for Harrisonville was almost ready to be issued when Aquila asked the plant location on the permit be changed to Peculiar. The public notice period was started October 22, 2004 for that project. The hearing is scheduled for Monday, November 22, 2004. Due to a popular sporting event taking place at the same time as the hearing, notice was given that written comments are given equal weight to oral testimony and written comments can be submitted if anyone is unable to attend the hearing.

The Doe Run – Buick PSD permit is still on public notice period. The public notice period for this permit ends Monday, November 1, 2004. No hearing requests have been received and October 28, 2004 is the last day for such a request to be made. If no hearing requests are received, then the hearing will be cancelled. No comments have been received yet, but Ms. Moore stated that she has heard several people intend to submit comments. Comments can be submitted in writing until Monday, November 1, 2004, 5:00 p.m.

Commissioner Beard inquired as to why it took 807 days for Columbia Municipal Power Plant to be approved [Page 64 of the briefing document; middle of the page].

Ms. Moore was unfamiliar with the details of the operating permit project but will check into it.

3) OPERATIONS

Jim Kavanaugh referred the commission to the three Operations reports beginning on Page 77 with the Rules and SIP Agenda.

A proposed revision to the Transportation Conformity Emissions Budget for the St. Louis 1-hour Ozone Maintenance Plan will be presented during today's public hearing.

Mr. Kavanaugh next referred the commission to the Rules in Progress Schedule on Page 107.

Mr. Kavanaugh explained that due to the recent statutory changes regarding the rule making process, another 60 day pre-notice is required prior to filing rule making proposal with the Secretary of State's Office. There are three rules in that process currently, which do not show up in the table. They include annual updates, incorporating federal requirements under NSPS, MACT and NESHAP.

The State Air Quality Plan Status Report begins on Page 111.

Mr. Kavanaugh stated that several useful Web sites have been added to the briefing document on page 135. Mr. Kavanaugh noted some changes would be made to this. One would be making the print larger in order to make it more easy to read; another would be to add one or more sites such as the Environmental Assistance Office's Web site.

Chairman Collins thanked Mr. Kavanaugh and said they were very helpful.

Mr. Kavanaugh apologized to the commissioners and to the public for the change in meeting location. The location was changed due to a local plane crash and the original meeting place was being used by crash investigators. Notices were sent out that the meeting place had changed, but in the event someone did not receive the notice or were not aware of the change in location, he noted public comments can always be submitted by fax or in writing.

Two petitions to amend rules have been received by the program. During the September Commission meeting, the Department of Energy made a presentation to request the amendment of the Kansas City Solvent Metal Cleaning Rule at the same time the St. Louis Rule is amended. Also, a written petition from the University of Missouri was sent to the commission requesting that the opacity rule for their wood fired ceramic kiln be amended.

Mr. Kavanaugh stated that the program will evaluate the request. The program has to look at the technical feasibility and the necessity before determining appropriate action.

Mr. Kavanaugh was not sure if anyone from the University of Missouri was attending today's meeting. A year ago in October 2003, the commission granted a variance to the university to operate a wood-burning kiln for ceramics. That variance expires this month. Mr. Kavanaugh stated that even if the program could act on this petition, because of the rule making statutory timelines, it would take 12 to 18 months to complete a rulemaking.

Chairman Collins asked if Mr. Kavanaugh would notify the university and Mr. Kavanaugh replied in the affirmative.

Mr. Feeler stated he would follow up with the university.

Mr. Kavanaugh noted two technical workgroups have been established for the development of the St. Louis 8-hour ozone and PM_{2.5} SIP. One group will focus on inventory and modeling issues. The other will work on control strategy analysis. Information from these workgroups will be put on our Web site and be provided through presentations to the Air Quality Advisory Committee at East West Gateway Council of Governments.

Mr. Kavanaugh stated that the EPA has not finalized Phase II of the Implementation Rule for the New 8-hour Ozone Standard, which establishes what is going to be required in the SIP. Mr. Kavanaugh stressed that work must continue to meet the SIP submittal deadline even though we do not know what all will be required in these plans. EPA has indicated that they expect to publish the final Phase II rule by the end of the year.

Mr. Kavanaugh also stated the NOx SIP Call is on a very tight schedule. April 2005 is the date to submit the SIP to the EPA.

Mr. Kavanaugh stated that the program has held stakeholders meetings with the utilities, cement kilns, and large industrial boiler operations. He feels confident that the program will be able to bring those rules to the commission for public hearing early in the spring.

Mr. Kavanaugh also stated that the Regional Haze SIP call is due in 2007. As part of that plan, states have to identify which of their sources meet best available retrofit technology (BART) eligibility criteria: The criteria include emissions of more than 250 tons per year of any haze causing pollutants and construction 15 years prior the construction permitting regulations (1962-1977). In order to assist in determining BART eligibility, the program sent a survey to over 200 companies to get necessary information. The program expects there will be very few sources that fit these criteria.

Mr. Kavanaugh noted that Chairman Collins attended the last Kansas City Clean Air Action Plan Workgroup meeting on October 15, 2004. The next step is prioritizing the control strategies from input that has been received. Then the workgroup can move forward with implementation. The program held a conference call with representatives from the State of Kansas and Mid America Regional Council to discuss further modeling efforts on control strategies. The goal is to have a final clean air action plan by January 2005.

Commissioner Foresman asked what the timing would be on the final Kansas City Ozone Report.

Mr. Kavanaugh stated the ozone season ends this month. The program has to quality assure (QA) the data and then it can submit it to EPA. Along with the QA data, the program intends to submit a letter that requests EPA designate the area in attainment. This should happen by the end of December. EPA Region VII has requested clarification from headquarters regarding interpretation of the requirements for submitting a Maintenance Plan under Section 110 of the Clean Air Act.

5) DIRECTOR'S REPORT

a) Program Staff

David Gilmore has been hired as the new Commission Secretary.

b) Interim Committee on Vehicle Emissions Testing

The interim committee has set its first meeting for November 18, 2004, 9:00 a.m., at the Holiday Inn, intersection of Interstate 55 and Lindberg Boulevard in South St. Louis County, Missouri. The program will send a notice to the commissioners.

c) Idle Air Truckstop

The EPA awarded the Air Pollution Control Program a \$100,000 grant to deploy a truck stop electrification project. This is approximately 1/5 of the money needed to complete the project.

Truck stop electrification is technology using a self-contained unit that truck drivers place in their window. The unit allows them to power their electrical systems (internet, radio, television, etc.) without having to leave their truck idling.

Commissioner Beard inquired if the truckers rented it back.

Ms. Tippet Mosby explained that private companies install the electrification units under agreements with the truck stop owners. The truck drivers pay a fee to use the service for the time that they are at the truck stop. This service is beneficial to the truck driver since they do not have to use fuel to keep their truck running and it is beneficial to the environment since the vehicle is not emitting pollution. Ms. Tippet Mosby offered to keep the commissioners updated on the project.

d) STAPPA/ALAPCO Update

Ms. Tippet Mosby mentioned that she just returned from the fall meeting of the State and Territorial Air Pollution Program Administrators and Association of Local Air Pollution Officials (STAPPA/ALAPCO). Ms. Tippet Mosby said she would provide a briefing of the highlights at the next commission meeting.

e) Holcim Settlement

Holcim and the environmental groups that were challenging the company's permits have reached a \$3 million settlement agreement. A breakdown of the settlement is as follows: \$1.8 million for land conservation in Missouri and Illinois; \$908,000 for air quality monitoring, education and energy efficiency measures in Missouri and Illinois; \$125,000 to the Washington University Law Clinic for their appeal work; and \$150,000 for the Ozark Regional Land Trust, which will manage the conservation easement on the land.

Ms. Tippet Mosby offered to ask Ted Heisel if he would give a detailed presentation.

Chairman Collins and the other commissioners concurred that they would be agreeable to a presentation.

D. Unfinished Business

None

E. Public Hearing

Chairman Collins called the public hearing to order.

Ron Jeffries presented Missouri State Implementation Plan – Maintenance Plan for the Missouri Portion of the St. Louis Ozone Non-Attainment Area Including On-Road Motor Vehicle Emission Budgets.

To obtain a copy of the hearing transcript, please contact the court reporter.

F. Recommended for Adoption or Actions to be Voted on

Paul McConnell presented 10 CSR 10-6.061 (amendment) Construction Permit Exemptions. Information on the proposed amendment begins on Page 91 of the briefing document.

Commissioner Foresman inquired if the Air Pollution Control Program's analysis was sufficient enough to meet EPA's requirement for, "substantial analysis showing that the revisions won't impact the national air quality plan."

Ms. Tippet Mosby assured Commissioner Foresman the program will be able to provide a sufficient analysis when the rule is submitted requesting a SIP revision.

Commissioner Beard moved to approve the amendment. Commissioner Foresman seconded, all commissioners voted to approve the amendment.

Paul McConnell presented 10 CSR 10-6.120 (amendment) Restriction of Emissions of Lead From Specific Lead Smelter-Refinery Installations. Information on the proposed amendment begins on Page 105 of the briefing document. Commissioner Foresman moved to approve the amendment. Commissioner Pufalt seconded, all commissioners voted to approve the amendment.

PrintSTEP Variance Request

Jim Kavanaugh presented the PrintSTEP Variance Request. Information on the proposed variance begins on page 125 of the briefing document. Commissioner Foresman moved to approve the variance for a period of one year. Commissioner Pufalt seconded, all commissioners voted to approve the variance request.

G. New Business

None

H. Appeals and Variance Requests

OBD Variance Request

The On-Board Diagnostic (OBD) Variance Request was presented by Haskins Hobson. Information on the proposed variance request begins on Page 129 of the briefing document.

Commissioner Foresman inquired if other states have been having trouble with transmission codes.

Mr. Hobson replied that not all states have followed the EPA's recommendation of not allowing waivers for OBD vehicles. Mr. Hobson also stated that Wisconsin, Missouri and a few other states have followed EPA's recommendation to go ahead and put it into their rule and stated that it would not become a big issue as long as waivers are allowed.

Commissioner Foresman inquired if what we are proposing was to exempt all transmission OBD emission codes, and not just some.

Mr. Hobson replied that the reason there is not a specific list given for this variance is that the manufacturers are still developing more and more codes so that the list grows over time. The manufacturers have the responsibility of designing the car to illuminate the "check engine" light only for monitored systems that can increase the car's emissions. The only codes that we are interested in are the codes that cause the car to fail the OBD test by turning on the "check engine" light.

Commissioner Foresman stated that since we have to go through a rulemaking to make it permanent, we will be able to hear testimony. .

Mr. Hobson replied that since we are going to pass/fail in a couple of months, the variance is designed to bridge the time required to finalize the action through rulemaking.

Commissioner Pufalt inquired about the one percent figure for the 1996 and newer vehicles that would be eligible for the compliance wavier.

Mr. Hobson replied that the program is currently waiving a total of about five percent of the 1980 to 2004 model year vehicles total in the enhanced I/M program and that the one percent figure is a subset of the total figure.

Commissioner Pufalt verified that even if the one percent figure was for a full one percent it would still be adding less than one percent to the total five percent figure.

Mr. Hobson confirmed her verification.

Commissioner Beard moved to approve the variance. Commissioner Foresman seconded, all commissioners voted to pass the variance for a period of one year.

I. Open Session

Robert Brundage from Premium Standard Farms (PSF) gave a presentation to the commission concerning technology that PSF is working on. The presentation also detailed some work PSF has been doing pursuant to a consent decree that was signed with EPA. This work includes air monitoring to help determine types and quantities of emissions, and testing the efficiency of the permeable lagoon covers.

Mike Alesandrini addressed the commission concerning staff attending meetings in the St. Louis. There have been Air Advisory, SIP, I/M, and Upwind NO_x meetings that have been held with stakeholders. This is very helpful to get people who are not in the business of doing air quality every day more comfortable with what is going on.

Terry Spence addressed the commission concerning PSF and Mr. Brundage's presentation. Mr. Spence stated that he appreciated PSF's effort to work on a technology to reduce odors, but believes they are a long way from doing it. Mr. Spence also stated that he believes the lagoon covers are not effective, but hopes PSF will be successful with their fertilizer plant and what they are trying to accomplish. Mr. Spence said the citizens and their concern for their health and the health of their environment are to be credited for the innovation that is taking place at PSF. It has taken ten years for PSF to come this far.

Melody Torrey addressed the commission concerning PSF. Ms. Torrey stated that she lives a half-mile from PSF's Whitetail Facility and believes none of their technology is working to control odors. Ms. Torrey believes the technology at PSF's Whitetail Facility that is used to control odors is a failure and that we need to seek something better to help the citizens.

Commissioner Foresman stated that he believes the job of the commissioners is not done until the odor complaints are abated.

Ms. Torrey stated that most of the citizens in the Lincoln Township do not feel that the odors have improved and have gotten worse in some cases.

J. Future Meeting Dates

December 9, 2004 – Jefferson City

Governor Office Building

Room 450

200 Madison Street

Jefferson City, MO 65101

February 3, 2005 – Jefferson City

Harry S Truman Building

Room 490

301 W. High Street

Jefferson City, MO 65101

March 31, 2005 – St. Joseph

Meeting Room Pending

April 28, 2005 – Jefferson City

Harry S Truman Building

Room 490

301 W. High Street

Jefferson City, MO 65101

May 26, 2005 – St. Louis

Governor Office Building

Room 450

200 Madison Street

Jefferson City, MO 65101

December 8, 2005 – Springfield

Meeting Room Pending

K. Discussion of Pending Litigation and Legal Matters

Tim Duggan addressed the commission concerning Holcim and their recent settlement. Mr. Duggan stated that his only question was about Holcim's permits and whether or not they were going to be challenged any further. Mr. Duggan was told that this issue was resolved in the settlement. Mr. Duggan contacted the Administrative Hearing Commission (AHC) asking if this would allow them to reconsider taking the second Mississippi Lime case. The AHC said they would do that. Briefs have been submitted on the supplemental question asked by the Court of Appeals in the first Mississippi Lime case: whether or not a circuit court has superintending authority over this commission under Article 5 of the Missouri Constitution. Article 5 of the Missouri Constitution says that all final decisions of an administrative agency are subject to judicial review.

Mr. Duggan also addressed the commission concerning the Missouri Coalition for the Environment lawsuit against EPA with respect to the agency's failure to review the National Ambient Air Quality Standard for Lead. That case is proceeding and the Attorney General's separate litigation is also proceeding. EPA filed an answer in the AGO's case and the AGO has filed a motion for summary judgement. Both cases are moving swiftly and he should have more information at the next meeting.

L. Missouri Air Conservation Commission

Chairman Collins adjourned the October 28, 2004, Missouri Air Conservation Commission meeting.

Respectfully submitted,

Leanne Tippet Mosby, Director
Air Pollution Control Program

Approved:

Joanne Collins, Chairman
Missouri Air Conservation Commission

Department of Natural Resources
Air and Land Protection Division
Monthly Air Pollution Control Program Summary Report
For All Regions - 10/1/2004 to 10/31/2004

Number of Complaints Received RE:

<i>Asbestos</i>	9
<i>Burning</i>	63
<i>Fugitive Dust</i>	22
<i>Odors</i>	62
<i>Particulate</i>	14
<i>Non-regulated</i>	0
<i>Toxics</i>	1
<i>Other</i>	21

Of the above, 30 complaints involved multiple emissions.

Total of Complaints Received:. 155

Number of Investigations of Complaints:

<i>Received during report period.</i>	114
<i>Received prior to report period.</i>	27

Total number of investigations completed: 141

Number of Sources:

<i>Non-Regulated.</i>	0

NERO		10/21/2004	BEN BURSE	Louisiana	Pike	Burning	City of Louisiana		
<i>Comments</i>									
<i>Comp. No.</i>	NE10451	<i>Comp. Info</i>	A junkyard in the city limits is being cleaned up and relocated outside the city limits. The contractor for the property owner is digging holes, throwing a variety of wastes into the holes and setting the waste on fire then burying the remains. On October 6, 2004, the Louisiana Fire Dept responded to an underground fire caused by the burial of such material. A report on the response was faxed to the Northeast Regional Office. The City is concerned with the possibility of contamination remaining on the site. Several years ago, while city utility workers were trenching on the property, buried cars were encountered in the trench and created problems for the utilities. At one time there were several hundred vehicles, now most have been crushed and hauled away.						
NERO	10/1/2004	10/1/2004	PSF WHITETAIL	Unionville	Putnam	Odors	Melody Torrey	SMB	
<i>Comments</i> No on-site investigation made in response to this report due to the quickly changing variation in odors from changes in weather conditions and because of the one to two day advance notice required by the lab prior to analysis of air samples. An investigation will be scheduled during the next on-site investigation of this facility.									
<i>Comp. No.</i>	NE10395	<i>Comp. Info</i>	On September 30, 2004, the complainant reported odors from PSF Whitetail as follows, "On September 30, 2004, I would like to file an odor complaint on the PSF Whitetail site. As I drove by the site around 7:30 p.m. going east on Highway 129, I encountered strong gassy/lagoon odors coming off their factory farm. The odors made it difficult to breath and burned my eyes and nose. Fred, Leta and Melody Torrey report the odor moved in that evening. The odor was a strong hog manure smell and like the night before, the odor grew worse as the evening progressed and you could even smell it in the house."						
NERO	10/1/2004	9/28/2004	EADES FAMILY	Fulton	Callaway	Burning	Ardyce Kelley	MGS	
<i>Comments</i> Mr. Eads burned refuse in violation of the Missouri Air Conservation Law RSMo. 643 and regulation 10 CSR 10-3.030, "Open Burning Restrictions." Because the debris was washed in from the neighboring pasture and raw sewage had contaminated the area, it is recommended that no penalties be assessed.									
<i>Comp. No.</i>	NE10360	<i>Comp. Info</i>	Concern was relayed by e-mail. Message contained a second contact. Mr. Charlie Lord at 573-642-4988. Message reported activity by family in lot #25 including burning garbage. The message included pictures of what appeared to be smoke or haze in the area. Telephone call to Charlie Lord on September 29, 2004, resulted in directions to mobile home park, but no additional information.						
NERO	10/1/2004	9/28/2004	RONNIE KRAUS	Memphis	Scotland	Burning	Anonymous	SMB	
<i>Comments</i> Refer to NE10368 for details of investigation. Found accidental burning of wastes during salvage operation. Issued warning letter.									
<i>Comp. No.</i>	NE10361	<i>Comp. Info</i>	Complainant reported open burning of tires in a junk yard. Complainant said the junk yard had two fires today. Burning occurs frequently. Once the operator was working on a vehicle that exploded.						
NERO	10/1/2004	10/1/2004	PSF WHITETAIL	Unionville	Putnam	Odors	Melody Torrey	SMB	
<i>Comments</i> The Blankenship farm is a Class 1C facility and is not subject to the Missouri Air Conservation Commission Odor regulation.									
<i>Comp. No.</i>	NE10407	<i>Comp. Info</i>	On September 30, 2004, the complainant reported odors from the Blankenship PSF contract farm as follows, "On September 27th, 29th, 30th, 2004, Jeri and Lynn McKinley would like to file odor complaints on the Blankenship PSF contract barn. They have been applying waste this week and the smell at the McKinley property has been unbearable. The odor is a strong lagoon/hog manure smell.

NERO	10/1/2004	9/28/2004	RONNY KRAUS	Memphis	Scotland	Burning	Sheriff Bill Holland	SMB	
<i>Comments</i>	Contacted Mr. Kraus at the property. He stated an accidental fire started at the time of the incident. It started while Mr. Krous was using a cutting torch to salvage metals. He stated he is removing metals to clean up the property. It is scattered with pieces of metals and parts of cars. A company from Kansas is located at the property crushing metals. Mr. Kraus said he was aware of restrictions against burning of metals for salvage and does not do any burning at the property. We discussed that he needed to keep a water sprayer or fire extinguisher near by while cutting metals to put out any accidental fires. Sent a warning letter describing restrictions against burning for salvage and about burning regulations.								
<i>Comp. No.</i>	NE10368	<i>Comp. Info</i>	Complainant reports incineration and nuisance odors.						
NERO	10/1/2004	10/1/2004	TRAVIS MADDOX	Kirksville	Adair	Other	Paul Frazier	SMB	
<i>Comments</i>	On October 1, 2004, regional office staff stopped by and looked at property while in Kirksville. The tank pit has been filled in and is covered with gravel. There is still some insulation and some metals on the property, but does not appear to have come from the building. On October 14, 2004, Travis Maddox returned a phone call regarding an asbestos inspection and demolition notification for the structure. He reported that he did inspect but had no proof that he notified the APCP. I told him I would issue a notice of violation if the Air Pollution Control Program (APCP) did not have the documents. The APCP reported no record of inspection, notification, or approval. Issued NOV #6395NE on October 14, 2004, for failure to notify the APCP of the demolition.								
<i>Comp. No.</i>	NE10372	<i>Comp. Info</i>	Contractor placed building demolition debris and concrete into a tank pit as fill material during underground storage tank closure activities. The complainant stated the contractor alleges that any debris pushed into the tank pit was excavated and hauled to a landfill. Seven receipts and seven photos are available to verify. The complainant is concerned state and city permits were not obtained and demolition debris is being improperly handled.						
NERO	10/4/2004	10/4/2004	GARY MORROW/G&M CONSTR	Marshall	Saline	Asbestos	Terry Ball	SMB	
<i>Comments</i>	Spoke with Mike Morgan, City Code Enforcement at 660-886-7411. He said G & M Construction had already completed the demolition project at 56 West Summit. It was completed around August 18, 2004. The waste was taken to Central Missouri Landfill by Wayne Brown. They provided seven landfill tickets to the City as documentation of proper disposal totaling approximately 35 to 40 tons. Landfill tickets were required by the City as proof of proper disposal. The structure was a one story residential house. He said he had inspected the removal of the slate siding and they appeared to be removing it properly by wetting, removal by hand and then enclosing it in plastic. The average bid for removal and disposal of houses has been approximately \$5000. This house was bid at \$4100 but that is likely because there was not a basement that had to be filled. No violation found of asbestos or solid waste regulations.								
<i>Comp. No.</i>	NE10414	<i>Comp. Info</i>	City of Marshall has hired G & M Construction to demolish a house with asbestos shingles.						
NERO	10/4/2004	10/4/2004	PSF WHITETAIL	Unionville	Putnam	Odors	Jack Parrish	SMB	
<i>Comments</i>	No on-site investigation made in response to this report due to the quickly changing variation in odors from changes in weather conditions and because of the one to two day advance notice required by the lab prior to analysis of air samples. An investigation will be scheduled during the next on-site investigation of this facility.								
<i>Comp. No.</i>	NE10387	<i>Comp. Info</i>	The complainant reports odors at his house from PSF Whitetail at 8:30 a.m. and again at 7:30 p.m. on Sunday, October 3, 2004. He said the odor was really bad at both times.						
NERO	10/5/2004	10/5/2004	C & M CONSTRUCTION	Palmyra	Marion	Burning	Anonymous	DJM	0827N
<i>Comments</i>	Observed open burning of wood waste, metals, and one aerosol can in fire behind the new house being constructed. Mike Clow and Rick Miller identified themselves as the owners of C & M Construction. They stated they were not aware they could not burn wood waste. Explained the Missouri Air Conservation Regulations concerning open burning of trade waste. Informed them they would be receiving a Notice of Violation.								
<i>Comp. No.</i>	NE10531	<i>Comp. Info</i>	The complainant reports a contractor building a new house at Weatherstone Subdivision is burning construction waste.

Comments	Facility is a class 1B size concentrated animal feeding operation (CAFO) and is not subject to CAFO odor regulations. Informed complainant of regulations.								
Comp. No.	1007865	Comp. Info	During the last couple of months, since the former McCaw hog facility has changed ownership, odors have gotten worse. Complainant lives an 1/8 of a mile from facility. Odors get bad in the house even when the air conditioner is running. Especially bad when winds are out of the east.						
NERO	10/12/2004	10/12/2004	PSF WHITETAIL	Unionville	Putnam	Odors	Melody Torrey	SMB	
Comments	No on-site investigation made in response to this report due to the quickly changing variation in odors from changes in weather conditions and because of the one to two day advance notice required by the lab prior to analysis of air samples. An investigation will be scheduled during the next on-site investigation of this facility.								
Comp. No.	NE10398	Comp. Info	On October 8, 2004, the complainant reported odors from PSF Whitetail as follows, "I would like to file an odor complaint. As I drove by the site early this morning then again this afternoon on Highway 129, I encountered strong gassy/lagoon odors coming off their factory farm. The odors made it difficult to breath and burned my eyes." On October 10, 2004, the complainant reported, "On October 9, 2004, we all would like to file an odor complaint. The odor was first noticed around 10 a.m. and has come and went all day before moving in strong that evening. The odor was a strong hog manure smell. The wind is out of the east for the most part. October 10, 2004, We all would like to file an odor complaint. The odor has stayed with us for yet another day and it has been a lot stronger than it was the day before. The odor is a strong lagoon smell. The wind still appears to be out of the east."

An investigation will be scheduled during the next on-site visit of this facility.									
<i>Comp. No.</i> NE10380 <i>Comp. Info</i> The complainant reported they have had odors from PSF Valley View numerous times (probably every third day) at his house during this past summer. Odors this morning were terrible at his mother's place near Mystic. Odors were coming from PSF Valley View because there's a northeast wind.									
NERO	10/12/2004	10/7/2004	MARK TWAIN OXY & MED SPLY	Hannibal	Ralls	Burning	Alan Reinkemeyer	DJM	
<i>Comments</i> Discussed report with Angela Miller, store manager for Mark Twain Oxygen and Medical Supply. She stated they do not burn anything from their store. They have a dumpster for trash pickup. She also stated they lease the building for their business. The landlord occasionally burns trees from land clearing. He plans to build more buildings at the site. She then stated she and her employees observed smoke east of their facility on the day in question. No evidence of past open burning was observed at the site on the day of the investigation. No violations observed.									
<i>Comp. No.</i> NE10411 <i>Comp. Info</i> The complainant reported open burning of trade waste including plastic. Fire was in progress on date of call.									
NERO	10/12/2004	10/7/2004	S & S AUTO REPAIR	Hannibal	Ralls	Burning	Alan Reinkemeyer	DJM	
<i>Comments</i> Met at site with owner, Mr. Russel Smith. Mr. Smith lives in a residence on the property. Discussed anonymous report with Mr. Smith and he stated he burned household trash from his residence on the date in question. The household trash included plastic items that caused a lot of smoke. Observed the burn area located directly behind the house and shop. Remnants of fire appeared to be household waste. Warned Mr. Smith he could not burn tires, or anything generated as a result of his business. No violations observed at time of investigation.									
<i>Comp. No.</i> NE10412 <i>Comp. Info</i> The complainant said an employee of neighboring business reported S & S Auto Salvage burned tires on October 6, 2004.

NERO	10/13/2004	10/5/2004	BILLY SUTTONS AUTO SALES	Brashear	Adair	Burning	Anonymous	MGS	
<i>Comments</i>	No violation of open burning regulations. There were no tires burned. Mr. Sutton used a cutting torch to remove a part from a vehicle. The torch set the grass on fire so he put the fire out with a fire extinguisher and returned to his shop. Approximately 1 hour later he smelled smoke and saw another car was on fire. He dragged it into the open where he could put out the fire. The grass fire had not been fully extinguished so it set the rubber rocker panel on fire. No violation of open burning regulations.								
<i>Comp. No.</i>	NE10375	<i>Comp. Info</i>	On October 4, 2004, at 6:10 p.m., tires were being burned at the Billy Suttons Auto Sales on Route 6 near Brashear.						
NERO	10/13/2004	10/4/2004	MIKE & LISA CRANE	Bethel	Shelby	Burning	Jerry Eber	MGS	
<i>Comments</i>	No violation of open burning regulations. Mr. Sutton had used a torch to cut a part off a vehicle. In the process he set the grass on fire. He attempted to put it out, but an hour later he smelled smoke. He found the grass had re-ignited and burned the rubber rocker panel on a nearby car. He voluntarily put out the fire. No violation and advised Mr. Sutton that he is responsible to prevent fires at his facility.								
<i>Comp. No.</i>	NE10374	<i>Comp. Info</i>	Complainant reported the Cranes were burning regulated waste along with brush in the foundation across from their house on September 29, 2004. The complainant did not personally witness the burning, but heard about it last weekend during a visit to Bethel from Wendy Brumbaugh, Joe Brumbaugh and from Dee, the Colony House Restaurant manager. It was reported that "big clouds of smoke came boiling out." The complainant also said, "We did not hear this from him, because he was tired of the whole thing." It was suggested if we wanted to find out more, we should make a trip to Bethel to talk to one of the people who were witnesses to the incident.						
NERO	10/13/2004	10/5/2004	RICHARD PONTING	Hale	Carroll	Fugitive Dust	Loren Worman	SMB	
<i>Comments</i>	Conducted an on-site investigation for dust blowing from the driveway. No dust observed. However, it rained on October 12, 2004, and so the driveway had not dried out yet. Spoke with the complainant and he stated he had observed some dust kicking up already today after the rain yesterday. He also stated the dust was observed at the entrance to Hale Ag Center from Highway 139. Don Kinkhorst will plan an inspection in the next couple of weeks and will check for dust at that time. No violation of the fugitive dust emissions at time of investigation.								
<i>Comp. No.</i>	NE10402	<i>Comp. Info</i>	Dust from Hale Ag Center is blowing onto complainant's property. The complainant has the following concerns about the watering for dust control at Hale Ag Center. 1) facility never waters the driveway between the grain bins & Route 139. 2) Although watering had been done several times today, it's not done often enough and not enough water is put on when watering. 3) The facility does not water at all over the weekends although trucks come in and out on both Saturday and Sunday.						
NERO	10/14/2004	10/13/2004	BART EDGERTON	Columbia	Boone	Burning	Anonymous	DLK	
<i>Comments</i>	Upon arrival at the site, Mr. Kinkhorst contacted Mr. Edgerton by telephone and informed him of the open burning regulations and collected contact information for Wildflower Development. Mr. Kinkhorst then observed debris piles located around the residence. Some charred vegetation was observed under two piles of construction debris. No open burning occurring at the time of this investigation. No violation of open burning occurring at the time of investigation. Sent Open Burning Fact Sheet to Wildflower Development.								
<i>Comp. No.</i>	NE10425	<i>Comp. Info</i>	Bart Edgerton, owner of Wildflower Development, is burning shingles, siding and other construction materials resulting from the construction of a home located at the end of Doe Brook Lane, north of Columbia.

NERO	10/14/2004	10/4/2004	JOHN PENDELTON	New Bloomfield	Callaway	Burning	David M. Knotts	SMB	0631N
Comments On October 12, 2004, spoke with Sheriff Kramer of Callaway County Sheriff's office. He said Mr. Pendleton was charged with assault on September 27, 2004. He will ask their undercover unit to give me a call. SMBKF and SMB conducted an on-site investigation into concerns. Contacted John Pendleton and discussed concerns and toured property. Used oil was burned that had been collected from other mechanic shops. Explained this is not allowed. Discussed storage of used oil. We found a household trash burn area west of house. No evidence of tires burned in debris. Mr. Pendleton said he did not burn tires. Found approximately 50 tires in a ditch. Mr. Pendleton said they were being stored there until they could be disposed of properly. They have a permitted wastewater system. Keith Forck made an inspection. Found an area where tires were burned. Mr. Pendleton said it was burned when several residents of the trailer park and their friends had a bonfire. He said he knew what they were burning and he had been there briefly when the burning took place. Issued Notice of Violation #0631NE for burning of trade waste. Found trailer houses that had a discharge of sewage from under the trailer. We discussed plugged sewer lines that develop leaks need to be fixed promptly and ultimately, he as the owner, is responsible. Found a house trailer with piles of trash outside the door. He said the residents have access to a trash dumpster and are just not getting it to the dumpster. He will talk to them.									
Comp. No. NE10454 Comp. Info The complainant reports the responsible party has a trailer park and lawn mower repair service. The trailer park is rat infested due to large quantities of garbage stacked outside various trailers or strewn about. This past weekend, several people held a bonfire and burned tires, oil and different fluids from the lawnmower repair shop. Raw Sewage leaks onto the ground and the dumping of chemical fluids (oil and transmission fluids) is taking place in nearby streams. There is land disturbance where a bull dozer has been active. May be burying something.									
NERO	10/14/2004	10/7/2004	GARY STARK AG SERV	Carrollton	Carroll	Burning	Larry Futz	AIS	
Comments Based on a picture and a report from Solid Waste staff, I contacted Mr. Gary Stark. He said he burns cardboard and wood cartons shipped to the shop. He agreed to cease burning trade waste. Burning trade waste did take place. I will mail a warning letter with a fact sheet and the rule to Mr. Stark. The warning letter will require a response stating intention to comply with the Open Burning Rule. Mr. Stark is supposed to send the NERO a letter by November 15, 2004, indicating his intention to stop burning trade waste.									
Comp. No. NE10421 Comp. Info Northeast Regional Office staff reported open burning of trade waste from the shop at Midwest Method Landfill. Mr. Fultz leases the shop to Gary Stark.									
NERO	10/14/2004	10/4/2004	JOHN PENERTON	New Bloomfield	Callaway	Burning	Ronny Burton	SMB	0631N
Comments Contacted Mr. Pendleton at the property. Found tenants and their friends had burned waste tires located at the property along with some paint stripper. The burning was done with Mr. Pendleton's knowledge. Evidence of the burning was observed at the rear of the property above the wastewater treatment facility approximately 150 feet. Gave Mr. Pendleton a copy of the open burning regulations. Told him tires are considered trade waste along with paint stripper or waste oil. None of these items can be burned. Issued Notice of Violation #0631NE to Mr. Pendleton for illegal open burning.									
Comp. No. NE10424 Comp. Info The complainant reports the responsible party is burning tires.									
NERO	10/14/2004	10/4/2004	GREG VANDERGRIFT	Holts Summit	Callaway	Burning	Anonymous	SMB	
Comments Conducted an on-site investigation. Contacted Greg Vandergrift. Found no evidence of burn debris on property at the locations mentioned. Mr. Vandergrift said he was not burning waste at his property. Informed him that solid wastes must be disposed of at a permitted landfill. He has a trash dumpster for disposal of waste. No violation of burning regulations found during investigation.									
Comp. No. NE10403 Comp. Info Responsible party scraps out cars and when they do, they cut the radiator and fuel lines and let the antifreeze and gasoline run directly onto the ground. Also, they let motor oil run on the ground, especially near their shop entrance and where the cars are being junked to the right of the shop. Have over 1,000 tires dumped in a large pile over half of them with no rims. These are at the rear center of the property behind their mobile home about 150 feet, near a large cedar tree. There is an unmarked drum out by the road also. Some burning has been done at the front near the large brush and trash pile and at the back of the property.

<i>Comp. No.</i>	NE10406	<i>Comp. Info</i> On October 13, 2004, at 8:30 a.m., the complainant reports a potent manure stink from PSF Somerset is present at his house. The odor was strong early, but it is very strong now.							
NERO	10/18/2004	9/9/2004	RON ATKINSON	Kingdom City	Callaway	Asbestos	Keith Forck	MGS	0652N
<i>Comments</i> Old motel demolished approximately five years ago and then left on the property in a large pile. Mr. Nathan Muenke, Environmental. Scientist, Certificate #7028061104MOIR10341 of Midwest Environmental Consultants, pulled samples from the materials in the pile and found three different patterns of sheet vinyl flooring contained 50-70% chrysotile asbestos in each pattern type. One multi-layered sample of roofing materials (shingles, felt and mastic) contained two to five percent chrysotile asbestos. One multi-layered sample of fiberboard with brown mastic contained three to eight percent chrysotile asbestos. One sample of gray siding with tan mastic contained 8-23% chrysotile asbestos. One multi-layered sample of sheet vinyl floor backing contained 50-70% asbestos. One sample of brown sheet vinyl backing contained 50-70% chrysotile asbestos. One multi-layered sample of sheet vinyl flooring contained 50-70% asbestos in both layers. Mr. Atkinson demolished a motel building that contained asbestos containing materials without inspecting the building for asbestos and failed to notify at least ten days before demolishing the building. Also, the Category I non-friable roofing, flooring and mastic was made friable during the process of demolition.									
<i>Comp. No.</i>	NE10426	<i>Comp. Info</i> A large pile of demolition and furniture waste is located behind the Gaspers Truck Stop and the Days Inn.							
NERO	10/18/2004	10/18/2004	FRED CARLSON COMPANY	New Cambria	Macon	Burning	Steve Boone	SMB	0632N
<i>Comments</i> Conducted an on-site investigation and contacted Mr. Larry Hackman, the employee watching the fire. He referred me to the Project Superintendent, Mr. Charles Davis. Mr. Davis said he had observed another construction company burning brush cleared from the Highway and had made the assumption burning of pallets would be allowable under Missouri Regulations. He explained he was unaware of the restrictions against burning of pallets for disposal. Explained open burning rules. He will dispose of pallets at a permitted landfill. Issued Notice of Violation #0632NE for open burning of trade waste.									
<i>Comp. No.</i>	NE10459	<i>Comp. Info</i> Pallets are burning at a construction site along Highway 36 in Macon County.							
NERO	10/19/2004	9/29/2004	CITY OF MOBERLY	Moberly	Randolph	Asbestos	Avis	DLK	
<i>Comments</i> Asbestos removed prior to demolition. No "wet demolition" required. No further action required.									
<i>Comp. No.</i>	NE10367	<i>Comp. Info</i> Workers demolishing Banquet Foods Building are not aware of asbestos present in the building. Work requires wet demolition of unsafe areas from which asbestos could not be removed. The complainant reports wet demolition is not taking place.

<p>Comments Conducted an on-site investigation from 9:30 a.m. to 9:58 a.m. on October 26, 2004. Drove around perimeter of PSF property downwind, which was east of the facility. No significant odors were detected. During the investigation, it was raining. A series of storms had come through the area about 8:30 a.m. No violation found during on-site investigation.</p>									
<p>Comp. No. NE10517 Comp. Info On October 22, 2004, the complainant reported odors from PSF Whitetail as follows: "As I drove by the site going east on Highway 129 this afternoon, I encountered strong gassy/lagoon odors coming off their factory farm. The odor made it difficult to breathe and burned my eyes." On October 24, 2004, the complainant reported odors from PSF Whitetail, "as I was changing the oil on my truck the odor moved in bad early this morning the odor was a strong hog barn smell. There was no wind at that time."</p>									
NERO	10/26/2004	10/22/2004	PSF VALLEY VIEW	Green City	Sullivan	Odors	Rolf Christen	SMB	
<p>Comments With winds from the west, it is assumed the odors reported on the first report were not from PSF Valley View. On October 26, 2004, an on-site investigation was conducted. Odors at or above a 54:1 dilution threshold level were detected at three locations. At two locations, odors were detected twice within one hour above the 54:1 dilution threshold. Completed an odor memorandum on the investigation. Two air samples were collected and submitted to St. Croix Sensory for analysis by olfactometry. Received olfactometry results from St. Croix Sensory on November 3, 2004. Levels of the Detection Threshold of 75 and 40 were below the standard in the Odor Regulation of 110. Also, the Odor Intensity from the samples were 9 and 12 respectively, which is less than the 225 ppm in the odor Regulation. No violation found of odor regulation during on-site investigation.</p>									
<p>Comp. No. NE10489 Comp. Info On October 22, 2004, the complainant made the following reports of odors from PSF Valley View, "On October 8, 2004, Debbie Jacobs called at 6:50 p.m. to tell us the wind came from the west and brought a horrible stink. She called back at approximately 8:15 the same evening and said it had left, then came back just as bad as before." On Sunday morning, October 10, 2004, Debbie contacted us again to report it had been stinking at their house since 7:30 a.m. Wind from the east. "Assuming it came from Valley View."</p>									
NERO	10/26/2004	10/19/2004	JAMIE SEATON, ROOFING	Greentop	Schuyler	Burning	Anonymous	SMB	0635N
<p>Comments Conducted an investigation on-site. Found a large burn pile. Met with Mr. Seaton. He said his neighbor had brought his household trash to the property and burned his trash together with some construction waste brought to the property by Mr. Seaton. This waste was generated from a construction job conducted by Mr. Seaton. Mr. Seaton described that he burns his waste other than shingles at his property in Greentop. The shingles are taken to the Onlyx landfill at Bevier. We discussed all the waste from his construction projects are prohibited from burning and it cannot be buried. Gave him a copy of the open burning regulations and the Construction and Demolition technical bulletin. Issued notice of violation #0635NE for illegal open burning of trade waste. Told Mr. Seaton his neighbor could not bring his waste to the property to dispose of it by burning either.</p>									
<p>Comp. No. NE10439 Comp. Info The complainant reports burning of construction debris and shingles. He stated this has been happening for a long period of time and would like it to stop.</p>									
NERO	10/26/2004	10/22/2004	PSF VALLEY VIEW	Green City	Sullivan	Odors	Avis and Bill Pierson	SMB	
<p>Comments Explained the process of investigation on odor reports. I will stop by their house when I'm in the area next. She asked me to call the day before the visit and she will arrange to be there or else ask her brother to be there. Conducted an on-site investigation of odors at PSF Valley view from 6:25a.m. to 8:15 a.m. and again from 10:40 a.m. to 11:50 a.m. on October 26, 2004. Left a message on Blake Boxley's voice mail at 7:00 a.m. that an investigation was being conducted. Odors at or above a 5.4:1 dilution threshold level were detected at three locations. At two locations, odors were detected twice within 1 hour above the 5.4:1 dilution threshold. Completed an odor memorandum on the investigation. Two air samples collected and submitted to St. Croix Sensory for analysis by olfactometry. Contacted the complainant by phone and spoke with the complainant's brother (Russell Alexander). He said odors from PSF Valley View were bad later on during the day on October 26, 2004. On November 3, 2004, received olfactometry results from St. Croix Sensory. Levels of the Detection Threshold of 75 and 40 were below the standard in the Odor Regulation of 110. Also, the odor intensity from the samples were 9 and 12 respectively, which is less than the 225 ppm in the odor Regulation.</p>									
<p>Comp. No. NE10468 Comp. Info Odors from PSF farm south of Green City are bad at the complainant's house. They live seven or eight miles south of Green City. The odors come and go. She wants something to be done about the stink.</p>

<i>Comments</i>	Open burning of lumber scraps in a 55 gallon drum beside the building. At the driveway was a large dumpster full of lumber scraps and refuse. On April 5, 2004, Paul Jeffery issued a letter of warning to Mr. Doug McKeller at 3729 Liverpool in Jefferson City for open burning pallet scraps at his pallet refurbishing facility. The open burning allegedly took place on March 3, 2004, off Callaway County Road 306 near the Elton Hensley Memorial Airport west of Fulton. Copies of correspondence attached. Penalties as appropriate.								
<i>Comp. No.</i>	NE10492	<i>Comp. Info</i>	Open burning pallets.						
NERO	10/27/2004	10/13/2004	JOHN PAYNE PAYNE ENTERPRI	Columbia	Boone	Burning	Camilla Hammond	MGS	
<i>Comments</i>	I investigated the pile of refuse at Little City mobile home park. A stump had been burned between the lagoon and the intersection of Sappington Road and Highway 22. Since the stump was burned, bags of sweetgum tree seed pods and small branches have been placed on the burnt stump. Household refuse such as a blue mat, a baby carrier and bags of refuse have been placed on the pile. I contacted Mr. John Payne and informed him of the situation and told him no violation had yet occurred. I wanted him to know so the pile would not be burned. No violation of open burning regulations.								
<i>Comp. No.</i>	NE10464	<i>Comp. Info</i>	A pile of items to be burned and evidence of items already burned. Photos are being processed. The pile is located west of the waster lagoon at the corner of Highway 22 and the county road.

<i>Comments</i>	Conducted an on-site investigation from 9:30 a.m. to 9:58 a.m. on October 26, 2004. Drove around perimeter of PSF property downwind, which was east of the facility. No significant odors were detected. During the investigation it was raining. A series of storms had come through the area about 8:30 a.m. No violation found during on-site investigation.								
<i>Comp. No.</i>	NE10518	<i>Comp. Info</i>	On October 26, 2004, the complainant made the following report of odors from PSF Whitetail, "The odor was still here this morning and has stayed with us off and on the rest of the day. The odor is a strong hog manure smell. The wind has been out of the east most of the day before turning to the east northeast this evening. It had rained this morning."						
NERO	10/27/2004	10/27/2004	MILLERSBURG TRACK AND FEE	Millersburg	Callaway	Burning/Asbestos	Anonymous	MGS	0653N
<i>Comments</i>	Mr. Sudholt found Mr. Michael Burden doing business as Prestige Construction, 218 South Ravine, Fulton, MO 65251, cell phone 720-363-3657 and home phone 573-642-8455. Mr. Burden demolished a lumber and concrete block car wash facility at the south end of what was the Dixie Chigger convenience store. That store is now the Millersburg Trade and Feed, LLC store. The building was covered in steel roofing and siding. The windows were removed along with the heater and other fixtures used in the car wash. Most of the lumber was salvaged, but some was burned behind the store. Prestige Construction, hired by Mr. O'Neal and his wife Mrs. Crane, in preparation to build a warehouse in the place of the car wash. Violations of the Open Burning Regulations as well as a failure to notify before renovation and/or demolition of a commercial structure.								
<i>Comp. No.</i>	NE10488	<i>Comp. Info</i>	The Dixie Chigger, a convenience store in Millersburg, is being demolished by the owners. The waste has been piled behind the Millersburg Track and Feed Store barn and has been burned for the past few nights. They were burning last night. Started with the demolition/burning on Sunday.

NERO	10/28/2004	10/28/2004	PSF WHITETAIL	Unionville	Putnam	Odors	Melody Torrey	SMB	
Comments No on-site investigation made in response to this report due to the quickly changing variation in odors from changes in weather conditions and because of the one to two day advance notice required by the lab prior to analysis of air samples. An investigation will be scheduled during the next on-site investigation of this facility.									
Comp. No. NE10519 Comp. Info On October 27, 2004, the complainant made the following report of odors from PSF Whitetail: "We all would like to file an odor complaint on the PSF Whitetail Site. The odor is still with us and is just as bad as it was. The odor is still a strong hog manure smell. The wind is out of the east and the weather started out being damp and foggy. Now it is just damp out and calling for more storms."									
NERO	10/29/2004	10/13/2004	JOHN DEERE CO	Carrollton	Carroll	Burning	Gary Stark	DLK	
Comments Upon arriving at the site, contact was made with the manager Mr. Tom Zapp. Informed Mr. Zapp a concern was filed with the department alleging trade waste was being open burned. Then informed Mr. Zapp of the open burning regulations. Mr. Zapp assured Mr. Kinkhorst all waste would be disposed of properly by putting it into the dumpster for disposal. Mr. Zapp neither confirmed nor denied open burning was taking place at this site. Mr. Kinkhorst did not view any evidence of open burning at the time of this investigation. Mr. Kinkhorst left with Mr. Zapp a copy of the Open Burning Regulation and of the open burning fact sheet. No evidence of open burning at the time of investigation. Mr. Kinkhorst informed the Mr. Zapp of the open burning regulations.									
Comp. No. NE10422 Comp. Info The complainant reported open burning of trade waste including crates and boxes on a weekly basis.									
NERO	10/29/2004	10/29/2004	PSF WHITETAIL	Unionville	Putnam	Odors	Melody Torrey	SMB	
Comments No on-site investigation made in response to this report due to the quickly changing variation in odors from changes in weather conditions and because of the one to two day advance notice required by the lab prior to analysis of air samples. An investigation will be scheduled during the next on-site investigation of this facility.									
Comp. No. NE10520 Comp. Info On October 28, 2004, the complainant made the following report of odors from PSF Whitetail, "Fred, Leta, and Melody Torrey would like to file an odor complaint. The odor was still with us the following morning and stayed off and on through the morning. The odor was a strong hog manure smell. The wind was out of the east southeast and it was raining and damp out."									
NERO	10/29/2004	10/25/2004	RICHARD PONTING	Hale	Carroll	Fugitive Dust	Loren Worman	DLK	
Comments No dust or bees wings viewed at the time of investigation. Mr. Kinkhorst met with Mr. Ponting, who stated approximately 75 loads of grain were processed the day of this complaint. Mr. Ponting stated the wind was blowing out of the north on October 25, 2004, and no particulate was blown to Mr. Wormans north of the facility. It has been raining nearly every day for the two weeks prior to this investigation. Mr. Kinkhorst conducted a routine air pollution inspection at the time of this complaint. It was determined this facility is in compliance and Mr. Ponting is conducting business at this facility as required in the March 26, 2003, settlement agreement. Mr. Kinkhorst contacted Mr. Worman by telephone on November 1, 2004, and informed him an investigation was conducted but no violations were found. Mr. Worman expressed his opinion that not enough was being done to stop the dust problem. Mr. Worman said something more needed to be done. Mr. Kinkhorst informed Mr. Worman everything was being done as required and nothing further can be done at this time. No violations observed at the time of investigation.									
Comp. No. NE10482 Comp. Info The complainant reported dust blowing from Hale Ag Center. The business is dumping grain today. There is dust on his vehicles. He reports some of it is bees wings, but there are also finer particles. The dust is from dumping grain and from the haul road.									
NERO	11/2/2004	10/25/2004	ALGIERS SALVAGE YARD	Columbia	Callaway	Other	Kenneth Morris	MGS	
Comments There has been no asphalt plant installed at the Algiers Salvage Yard east of Columbia. No violation of Air Pollution regulations.									
Comp. No. NE10527 Comp. Info The complainant stated Mr. Algiers has pulled in a mobile asphalt plant onto the salvage yard property on the north side of the highway. The complainant is concerned Mr. Algier is getting ready to start up the plant without proper notification or permits.

NERO	11/2/2004	10/27/2004	UNKNOWN	Edina	Knox	Asbestos	David	DJM	
Comments	Drove through Edina on Highway 6 the entire length of town three times. Did not observe any demolition in progress. Did not observe any buildings that appeared to be vacant or getting ready for demolition. Unable to determine the location of the complainant's concern.								
Comp. No.	NE10508	Comp. Info	The complainant contacted the APCP and stated the commercial building on 6th Highway in Edina is being demolished. APCP staff stated they do not have a Demolition Notice.						
NERO	11/2/2004	10/29/2004	TOM PAINTER	Bosworth	Carroll	Burning	Ron Wooden	MIH	
Comments	Located the Painter property but could not make personal contact with Mr. Painter. Information obtained from employees of the Farmers Store indicates they have no way to contact Mr. Painter by telephone, because he told them he does not have one. Both properties were inspected from the street right-of-way and although both properties appear to be used for storage of salvageable materials and are very disorderly, no burn debris was observed nor were any areas observed which indicated fluids were being disposed of on the ground. The ground was wet due to recent rains, so there could be areas on the property where it was not apparent. The first piece of property sitting on Highway 139, just inside the city limits did have a large pile of waste, which appeared to be in preparation for burning. Information obtained during the investigation indicated Mr. Painter does burn at this property at least once per week. A letter explaining the Open Burning Restrictions, a Technical Bulletin regarding the storage of waste, proper disposal of any fluids such as antifreeze, used oil, transmission fluids, etc, and an Open Burning Fact sheet is being mailed to Mr. Painter. A letter explaining the Open Burning Restrictions was mailed to Mr. Painter along with Technical Bulletins regarding the storage of wastes, and proper handling of fluids such as used oil, anti freeze, transmission fluids, and Open Burning. The allegation for the release of refrigerants will be referred to the U.S. Environmental Protection Agency, Region VII office for their consideration.								
Comp. No.	NE10511	Comp. Info	Tom Painter has two junky properties in Bosworth where he collects cars and appliances. Mr. Painter was doing open burning at the property last week and was burning old couches and other debris. The complainant believes fluids are being released onto the ground and he is releasing refrigerants into the air.						
NERO	11/8/2004	10/28/2004	MR. TED KETTLEWELL	Fulton	Callaway	Particulate	Judy Smith	MGS	
Comments	On the Judy Smith property I observed sandblasting medium on some tarpaper on the ground next to the creek between the properties. Osage Constructors Company, Inc. has violated Missouri Clean Air Commission regulation 10 CSR 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin.								
Comp. No.	NE10510	Comp. Info	OCCI has sand blasted Monday through Wednesday this week. Since the leaves have fallen off the trees between our properties, the sand blew through the trees and is all over the leaves that have fallen.						
SERO	10/1/2004	10/1/2004	CURRENT RIVER POLE	Licking	Texas	Burning	Ed McElfresh, Safety Coordinat	DRL	
Comments	The Pole Company has bought several hundred acres of pine timber for pealing, drying in a proposed kiln, shipment to another state. There is no kiln on the site now, and no permits have been issued to the site. The property is inside the city limits of Licking. I talked to the manager on the phone, and he said they would stop burning and asked if SERO could come to Licking to discuss any permits needed and to discuss the intentions of the company. He said they were burning sawdust and clean up from the previous tenant, (The City of Licking) in preparation for the construction. Refer to SERO APCP for follow up.								
Comp. No.	SE4345	Comp. Info	A new Pole Mill is starting near the prison in Licking. They are burning sawdust and "Peelings" in the evening and the smoke is causing problems in the prison population.

SERO	10/1/2004	9/28/2004	CHARLES HUNGE, J.W. STRAC	Cape Girardeau	Cape Girarde	Fugitive Dust/Particulate/Burning	Mike Morgan	AW	
Comments	At this time, no smoke observed, no ash in air. The local fire department informed them to use blowers and not try to burn so much material at one time. Informed Mike Morgan of the Cape Fire Department they are required to operate the air curtain destructor as stated in the permit. He was going to inform Mr. Strack to implement the blowers, and if they didn't then Mike Morgan of the fire department was told to tell them we could revoke their permit. On October 1, 2004, I called Fire Chief Marshall and he informed me Mr. Strack had been having trouble with the air curtain destructor. He said they activated the blowers, brought in an additional unit on Thursday, September 30, 2004, and were burning smaller piles of brush. At this time, it appears all was going well.								
Comp. No.	SE4326	Comp. Info	J.W. Strack is burning (Charles Hunge permit from DNR). Not using blowers on the unit. Smoke and ash going into ambient air trying to burn large amount at one time. The Cape fire department went by. The unit is not being supplemented with blower. They were shut off.						
SERO	10/4/2004	9/22/2004	UNKNOWN	St. Robert	Pulaski	Burning	Anonymous	WS	
Comments	Since burn was complete and contractor had sought verbal permission from all the occupants within the 200 yard buffer, I informed the contractor that he would receive a letter of warning requiring written request for future compliance. Any future burns within the 200 yards buffer zone requires a land clearing burn permit with specific requirements. If he does not want to request a permit, he would need to insure that any burning is outside the municipality limits and beyond 200 yards from occupied structures. The burn was in a deep ravine at the rear of the building sites. I informed Mr. Dalgetty that regulations required a burn permit if within 200 yards of any occupied structures and that usually an air curtain distructor is required.								
Comp. No.	SE4261	Comp. Info	Hugh construction site has started burning a large area of trees.						
SERO	10/4/2004	9/22/2004	ROY LANG	Cherryville	Crawford	Other	Anonymous	GAG	
Comments	I called Mr. Lang who said he knew waste tires should not be burned, and had no intention of doing so. He said he is trying to build a tire cutter. He would like to haul in more tires, but I warned him if the machine did not work, he would still have to dispose of the tires. I also advised him he should get a hauler permit and talk with the SWMP about other requirements. The waste tire fee has lapsed and thus caused the loss of staff to perform waste tire activities.								
Comp. No.	SE4266	Comp. Info	Neighbor is collecting tires. He has about 300-400 tires. He says he is going to burn them. There is a sinkhole about 50-100 feet from the tires. Complainant wants Mr. Lang warned not to burn tires.						
SERO	10/4/2004	9/29/2004	STODDARD COUNTY GIN	Bernie	Stoddard	Fugitive Dust	Linda Young	JC	
Comments	Did not observe the dust blowing off the property. A compliance inspection was completed and the haul roads, parking areas and module storage area were extremely dry. Facility immediately responded and began applying water to the haul roads, the module storage areas and the parking areas. It has been over eight weeks since the last significant rainfall. Observed again on October 6, 2004, at 2:30 p.m.. Haul roads, parking and module storage areas had been watered recently. Continue to observe when in the area.								
Comp. No.	SE4308	Comp. Info	Stoddard County Gin is stirring up dust and cotton is gathering on complainant's windows.

<i>Comments</i>	Farmer brought in three modules with hot spots in the middle. The first module caught fire when the module was placed on the module feeder and oxygen was added to the hot spot. The module burned on the feeder and some of the cotton went through the gin on fire causing a lot of smoke. Later another module from the same farmer caught fire on the modules storage yard. The fire department was called to put out the fire. In the process, the fire department spread the module on the ground and caused the fire to become worse. The module burned for two days. The department was notified immediately. No violations observed. No further action taken.								
<i>Comp. No.</i>	SE4352	<i>Comp. Info</i>	Cotton gin is burning waste.						
SERO	10/6/2004	10/5/2004	WAL-MART CONTRACTORS	Fredericktown	Madison	Fugitive Dust/Particulate	Anonymous	AW	
<i>Comments</i>	Spoke with Bruce Franklin, Project Superintendent. The site is being prepared for a super Wal-Mart building. Did not observe dust leaving the property site, but due to dry conditions the construction equipment could easily stir up dust. A water truck was onsite and entrances were being watered down. Mr. Franklin said a site entrance was found to have rock requiring them to blast. He said the blast did create a heavy plume of dust, which upon settling drifted across the highway. He did not expect the result. Since the blasting by the highway was essentially a one time shot, no violation was submitted.								
<i>Comp. No.</i>	SE4342	<i>Comp. Info</i>	Fugitive dust is forming a huge cloud over U.S. 67 near Fredericktown.						
SERO	10/6/2004	9/28/2004	RONNIE PRICE	Caruthersville	Pemiscot	Open Dumps	Anonymous	DRL	
<i>Comments</i>	The location could not be found. No further action necessary.								
<i>Comp. No.</i>	SE4320	<i>Comp. Info</i>	Dumping and burning demolition waste.						
SERO	10/6/2004	9/21/2004	JON RUDOLF	Richwoods	Washington	Fugitive Dust/Odors	Anonymous	AW	
<i>Comments</i>	Races were held September 25, and 26, 2004, after the date of complaint. Mr. Rudolf does hold some races during week days, but mainly on Saturday and Sunday and did hold races prior to September 21, 2004. He said he has never had anywhere near 500 people. He uses saw dust on track and when dust begins to be stir he uses a water truck. No violation observed on October 6, 2004. The outhouse has a 350 gallon plastic tank, which collects waste and is periodically pumped out. Recommended track be watered as often as possible. The saw dust holds down a lot of the dust. The noise and emission from ATV's and motorcycles is not an issue for the department.								
<i>Comp. No.</i>	SE4264	<i>Comp. Info</i>	Complainant reports Motorcycle and ATV Races are ran everyday and creating dangerous dust and smoke. Also as many as 500 people are using one outhouse, creating a stench that is undesirable.						
SERO	10/13/2004	10/8/2004	UNKNOWN	Richwoods	Washington	Other/Fugitive Dust/Odors	Anonymous	AW	
<i>Comments</i>	Complaint received on October 8, 2004. Races ran on September 25 and 26, 2004. At most 196 riders. Out house has 350 gallon plastic tank. It had not rained by the date of the races and was dry but a water truck was used. Track overlaid with saw dust to hold down dust. When track would become dusty water is applied per Jon Rudolph, owner. He said he and the owner of another track in nearby area are at odds. Rudolph ran other track, but started his own. He feels other track owner, Craig Herman is mad because he is not getting riders as before. Rudolf is being sued by nearby neighbors for nuisance control. Recommended he continue to water track, keeping saw dust wet as possible. No violations observed on previous visit.								
<i>Comp. No.</i>	SE4378	<i>Comp. Info</i>	Complainant states there is bad air, dust and smoke from 200 to 300 motorcycles and ATV's stirring up dust, creating noise and all using one hole in the ground for an outhouse. Plus someone is going to have a very bad accident with the traffic on Highway 47.

SERO	10/14/2004	9/24/2004	MR. DEREK HEDGES	Richland	Pulaski	Burning	Anonymous	WS	
Comments	On site investigation conducted on October 14, 2004, owner not available and no other personnel present. All burn residue had been removed. Area adjacent to driveway was scraped level and appeared to be the location where the garage structure formerly occupied. Hazelgreen Fire Protection District Report for incident #0124, indicates fire personnel responded on September 24, 2004, at 9:50 a.m., to 26080 Highway 7 South, Richland (the owner, Derek Hedges), to extinguish a fully involved structure (garage) separate from the home. The fire department report indicates asbestos and tiles were present in the structure. The owner set the fire as a controlled burn to dispose of the structure and fire fighters extinguished the controlled burn. Burn residue/debris with asbestos containing materials is considered special waste and must be disposed of at a permitted landfill as such. The owner will be required to provide a copy of the landfill receipt to demonstrate proper disposal of burn residue and a notice of violation will be issued for violation of the Open Burning Regulations 10 CSR 10-3.030. Any further actions will be at the discretion of the department's Air Pollution Control Program.								
Comp. No.	SE4276	Comp. Info	The open burning of a garage with asbestos siding and tile. Fire fighters put out the fire (see incident report).						
SERO	10/14/2004	10/14/2004	JACK WOODS	Winona	Shannon	Burning	Winnie Weber	GAG	
Comments	Jackson Bostic, Environmental Emergency Response (EER) went to the site and observed the burning. Mr. Woods had been warned previously not to burn the wastes. A Notice of Violation and transmittal letter will be sent to Mr. Woods when the EER report is finished.								
Comp. No.	SE4397	Comp. Info	Open burning of a demolished house at 2:00 a.m. on October 14, 2004.						
SERO	10/15/2004	9/23/2004	SEAN CATO	Perryville	Perry	Burning	Robert Moll	AW	
Comments	Observed site where burning was evident. Location out of city limits and is 200 yards from all houses except Mr. Cato's. No one home. Tried to contact Mr. Cato by phone, unsuccessful. Further burn area is next to a small sinkhole, but he will be able to burn if he moves away from the sinkhole. Contacted Cato's by phone. He will contact office for a permit. The area is suitable outside city limits and is 200 yards away from residents. No violation cited.								
Comp. No.	SE4270	Comp. Info	Complainant states the reported party owns a tree trimming and stump removal business and is bringing the material in and burning it in a sinkhole approximately 200 yards from the complainant's house.						
SERO	10/19/2004	9/27/2004	DEAN SWALLOWS	Dexter	Stoddard	Burning	Al Banken	AB	se312
Comments	Mr. Dennis Lyons contacted the Dexter Fire Department and the Dexter Police Department to obtain official reports of the burning incident. According to these reports, Mr. Eugene Hampton was paid to set the mobile home on fire and the mobile home was owned by Mr. Dean Swallows. The Southeast Regional Office issued Notices of violation #s 3123SE and 3124SE based on the information contained in the reports. No department personnel were on site at the time. Mr. Al Banken, Dexter Fire Chief, estimated the burning pile of waste to be approximately ten square feet in size. Photographs attached.								
Comp. No.	SE4278	Comp. Info	Complainant states the reported party had Mr. Vernon Hampton burn his trailer. Mr. Hampton was in the process of doing this when the fire and police department arrived and put out the fire.						
SERO	10/19/2004	9/17/2004	MONROE TERRACE APTS.	Desloge	St. Francois	Other	Jesse Hedgecorph	DRL	
Comments	No violation. No further action.								
Comp. No.	SE4243	Comp. Info	Complainant states garbage is being dumped by residents of the Monroe Terrace Apartments in the dumpster across from his patio and is causing him breathing problems. The smell from the garbage is horrible and he cannot enjoy sitting on his patio because of the smell. He is a throat cancer survivor and his doctor says he needs to be around clean air, not polluted air.

Comments	Cliff Jordan has a parcel of property located at the above address. He has dumped several truck loads of demolition waste on the property and has burned some of it. Referred to the Solid Waste Management Program for determination of violation.								
Comp. No.	SE4374	Comp. Info	Dumping and burning waste from remodeling business. Trash, vinyl siding, railroad ties, electric wire. All sorts of building/demolition waste being dumped.						
SERO	10/19/2004	10/14/2004	BERRY COTTON GIN	Holland	Pemiscot	Fugitive Dust/Particulate/Other	Anonymous	JC	
Comments	The dust and lint problem was the result of a cyclone malfunction. It only occurred for a short time before the gin was shut down and corrected. No violations observed. Report on annual compliance certification.								
Comp. No.	SE4389	Comp. Info	Dust and lent from cotton gin is terrible.						
SERO	10/19/2004	9/30/2004	LEADBELT MATERIALS	Park Hills	St. Francois	Other	Anonymous	TR	
Comments	No violation was observed. Leadbelt materials operates an older model hot asphalt batch plant at this location and a cold mix pugmill. I will be performing an air inspection later in the fiscal year at this location. I will pursue this matter further at that time. However, it is very difficult to get an odor violation using a scentometer since volatile organic compounds are absorbed by the activated charcoal.								
Comp. No.	SE4316	Comp. Info	Air has chemicals in it from the factory that makes black top.						
SERO	10/19/2004	9/17/2004	ST.FRAN.CO. HWY DEPT.	Desloge	St. Francois	Other	Jesse Hedgecorph	DRL	
Comments	No violation. No further action.								
Comp. No.	SE4244	Comp. Info	Complainant states the reported party is tearing up asphalt on the street beside his house (on Highway 8), causing dust and horrible odors from burning asphalt. He can't sit out on his patio because of it. He is a throat cancer survivor and his cancer doctor told him to breathe only clean air, not polluted air.						
SERO	10/20/2004	10/12/2004	HARRY KLASNER	Salem	Dent	Burning	Anonymous	WS	
Comments	Home located on gravel county road in rural area, approximately one mile west of the main road through Montauk State Park. Home owner not present at time of investigation. Neighbor stated the Klaesners are only at the Montauk vacation home on weekends during trout season. The remainder of the year they reside in the St. Louis area. No railroad ties were observed anywhere on the property, nor did any railroad ties appear to be in the burn area. Several small landscape logs were beside the drive to define a vehicle parking area. Residue at the burn site appeared to be only household refuse and some small limbs. Copies of the departments Open Burning Fact Sheet and Technical Bulletin on Railroad Ties and Utility Poles were left with my business card inside the storm door of the house. No violations noted.								
Comp. No.	SE4375	Comp. Info	Burning railroad ties is causing a terrible smoke.						
SERO	10/25/2004	10/4/2004	NAME UNKNOWN	Dexter	Stoddard	Burning	Betty Gardner	DRL	
Comments	No burning was observed, and there was no burned spot observed at any of the houses near the trailer park. No violations observed. No further action.								
Comp. No.	SE4391	Comp. Info	Complainant states the reported party has been open burning and now has a linoleum rug he will also burn with leaves and limbs.

Monthly Air Pollution Control Program Detail Report

Dates Received or Inspected: 10/1/2004 *through* 10/31/2004

<i>Region</i>	<i>Inspection Date</i>	<i>Date Received</i>	<i>Suspected Source Owner/Operator</i>	<i>City</i>	<i>County Name</i>	<i>Type of Complaint</i>	<i>Complainant</i>	<i>Inspector Initials</i>	<i>NOV</i>
SERO	10/27/2004	10/26/2004	AQUILLA YODER	Dixon	Maries	Fugitive Dust/Particulate	Jake Warren	WS	
Comments	At the time of the initial investigation, no personnel were present at the sawmill. Returned the following day. Utility poles were a one time project brought by a customer and the sawdust was removed by the customer (one truck load). The current sawdust pile was approximately 7 foot high by 18 foot in diameter. Recent rains had eliminated evidence of fugitive dust/particulate matter leaving the property of origin. The WPCP threshold (N/A) for sawdust piles unless greater than 1/4 acre for a NPDES storm water permit required. Treated wood poles currently are not considered hazardous waste. No violations were observed at the time of investigation. Sawdust is exempt from solid waste regulations if it is managed on site where it is generated. Recommendation was made to relocate current sawdust pile to another part of the property, cover sawdust pile with a tarp, or shelter sawdust within a building enclosure to eliminate particulate matter from leaving the property.								
Comp. No.	SE4444	Comp. Info	Sawmill fugitive dust leaving the property of origin and blowing onto neighboring properties. Sawmill operator is using some old treated power poles along with trees to make lumber. Sawdust is causing a problems with a neighbor and the neighbor is worried about kids playing in the sawdust.						
SERO	10/28/2004	10/14/2004	DAVID ARNDTS CABINETS	Poplar Bluff	Butler	Particulate/Fugitive Dust	Carlos Emerson	JC	
Comments	Mr. Arndts is working on the dust collection system. He currently is using a system designed for indoor use outside his facility. A complete inspection was completed. I did not observe any violations. An emissions inventory questionnaire (EIQ) has been requested. The EIQ will be evaluated by the APCP and the permit level will be determined. No further action.								
Comp. No.	SE4387	Comp. Info	Dust collector system is blowing particulate matter on the house across the street.						
SERO	10/29/2004	10/27/2004	MINERAL AREA COLLEGE	Park Hills	St. Francois	Other	Anonymous	TR	
Comments	No violation was observed. The material involved was segmentations transite piping that was buried on site and was dug up to make room for newer replacement pipes. Schemel - Tarrillion, Inc. was contracted to handle disposal under the assumption the material did contain asbestos. However, it was not sampled. None of the material I observed appeared to be friable. No further action is necessary.								
Comp. No.	SE4433	Comp. Info	The removal by workers at Mineral Area College who were not provided with proper personal protective equipment of pipes covered in thermal systems insulation believed to contain asbestos.

SWRO	10/1/2004	9/21/2004	MASTER TRANSMISSION	Fairview	Newton	Waste Oil/Other	Bonnie Delano	DWA	
<i>Comments</i> RS Used Oil Services Inc. used oil drums not marked. The facility rebuilds transmissions. They collect used oil and ship it off-site through RS Used Oil Services Inc. The facility has two solvent sinks. Solvent is managed with the used oil solvent 145 degree Fahrenheit. At one time the facility had a trash bin, due to others putting waste in the bin, the facility decided to have it removed. Now the facility burns their waste boxes and paper. Recommendations: Stop burning solid waste. Properly mark used oil containers.									
<i>Comp. No.</i>	SW5779		<i>Comp. Info</i> Burning oil and solid waste outside.						
SWRO	10/4/2004	10/4/2004	LORI OHENDORF	Hurley	Stone	Burning/Other	Anonymous	JDG	
<i>Comments</i> Burn site was still smoldering at the time of the investigation. Spoke with the reported party. She said they had burned the demolished house over the weekend. Their was no asbestos that she knew of and I didn't observe any obvious asbestos containing material at the burn site. The reported party said she had asked the local fire department and they had told her okay. However, I told her about the violation and she would need to dispose of the remainder properly at a landfill and be prepared to submit receipts.									
<i>Comp. No.</i>	SW5820		<i>Comp. Info</i> Two men were burning a house at approximately 10:45 and 11:00 p.m. Saturday night, October 2, 2004. They were holding hoses on the fire. No fire department trucks were seen. Residents built a new house in the last year behind the old one and wanted to get rid of the old house, which probably had transite siding. Will probably bury the burn residue.

<i>Comments</i>	No burning at the time of investigation. Evidence of previous open burning, but could not determine the contents as there is more unburned material now covering the site. Pile of unburned material contained vegetative waste and what looked like paneling from remodeling of the mobile home. Fire reports indicate only trash was burned by the reported party and do not mention Linda Church, who appears to be the owner. A letter of warning will be sent. I did speak with neighbors Bill and Amyu VuKonich. They pointed out where the burn site was and indicated that Linda Church was the owner. They also gave me the phone number Ms. Church had posted to call for inquiring about renting at #8 Oriole Lane.								
<i>Comp. No.</i>	SW5826	<i>Comp. Info</i>	Burning insulation, carpet, plastic (see attached).						
SWRO	10/12/2004	10/8/2004	ALPINE WOOD PRODUCTS	Marionville	Lawrence	Fugitive Dust/Particulate	Judy Jackson, Apple Lane Townh	PFV	
<i>Comments</i>	On October 12, 2004, a rainy day, observed east side sawdust collector with no enclosure dropping sawdust into a trailer. Sawdust was blowing over trailer but rain knocked it down before leaving the property. Notice chain link fence east of the collector was covered with sawdust. Spoke with Mr. Ron Kirkpatrick, plant manager, explained to him the sawdust from their operation may not leave their property or it is a violation. Mr. Kirkpatrick said they will enclose the sawdust collector this week and they have already ordered a new collector that will be completely enclosed. He will notify me when the east collector gets enclosed and when the new collector gets installed. The new collector will be installed in approximately four to eight weeks. Will inspect corrective action when completed.								
<i>Comp. No.</i>	SW5842	<i>Comp. Info</i>	Sawdust is leaving property and covering buildings, automobiles, etc. The sawdust is from both production and trucks hauling away. Sawdust is also being dumped at another location but the complainant said her husband would have to be contacted for specific directions.						
SWRO	10/12/2004	10/5/2004	BLYSTONE CABINETS	El Dorado Springs	Cedar	Burning	Greg Perkins	JDG	
<i>Comments</i>	Not burning at the time of investigation. Evidence of previous open burning, mostly untreated wood wastes with some regulated materials. Sheldon Funeral Home, approximately 100 yards south. Spoke with manager Vannessa Hardy on site. Told her no business wastes may be burned except some untreated wood wastes with conditions. All wastes must be taken to a permitted landfill. I also told her the empty lacquer/stain cans should be allowed to dry out, but they cannot be burned out. Because there are multiple businesses within 200 yards and there is no other place on the property greater than 200 yards, this facility does not qualify for the open burning exemption. Sent a letter of warning on October 27, 2004. The burn site will be cleaned up per the reported party.								
<i>Comp. No.</i>	SW5828	<i>Comp. Info</i>	Open burning trade waste.						
SWRO	10/14/2004	10/14/2004	RES	Carthage	Jasper	Odors	Michele Sanders	PFV	
<i>Comments</i>	RES is currently working on their odor problem. They will be enclosing most of the operation and will add an additional scrubber. They are working on a new oxidizer called chlorine dioxide. They are adjusting the levels for optimal results. They are working on a seal on a holding tank. They are pumping and hauling their waste water till such time as they can discharge to the city sewer. On October 13, 2004, RES did have two odor hits at a 7:1 dilution 15 minutes apart. We will continue surveillance of RES. No violation at this time. Unable to contact complainant. The phone number is incorrect and no mailing address is provided.								
<i>Comp. No.</i>	SW5848	<i>Comp. Info</i>	Odor after 7:00 p.m..						
SWRO	10/14/2004	10/7/2004	BOB'S SCRAP METAL	Springfield	Greene	Toxics/Other	Anonymous	PFV	
<i>Comments</i>	Contacted Alice Law with the U.S. Environmental Protection Agency's Freon Unit. Faxed complaint to her on October 14, 2004. 913-551-7623 phone, 913-551-7844 fax.								
<i>Comp. No.</i>	SW5836	<i>Comp. Info</i>	The complainant reports a Mr. Jerry Abby of Jerry's Appliances, 1000 East Commercial and 419 East Kearney to be disposing of appliances in an improper manner. Allegedly, Mr. Abby requests Mr. Richard Prag to perform repairs on appliances, which result in the release of refrigerants to the atmosphere. Bob's Scrap Metal takes some of these appliances and crushes them without extracting/recycling any refrigerants therein.

RULE AND SIP AGENDA

**December 9, 2004
Jefferson City, MO**

ACTIONS FOR PUBLIC HEARING:

(None Scheduled)

ACTIONS TO BE VOTED ON:

- * Missouri State Implementation Plan – Maintenance Plan for the Missouri Portion of the St. Louis Ozone Nonattainment Area Including On-Road Motor Vehicle Emission Budgets

The Missouri Department of Natural Resources is proposing to establish mobile source emission budgets for conformity purposes for the St. Louis ozone nonattainment area. Although the 2007 emission budgets were not formally established as a motor vehicle budget in the 1-hour ozone maintenance plan, the 2007 emissions budgets were included in the maintenance plan as emissions estimates for projected emissions inventories for that year. The mobile source emission budgets establish a cap on emissions that cannot be exceeded by predicted highway and transit vehicle emissions. The department has worked with the East-West Gateway Council of Governments Interagency Consultation Group in establishing the year 2007 mobile source budgets.

COMMENTS AND RESPONSES ON
PROPOSED REVISION TO
THE MISSOURI STATE IMPLEMENTATION PLAN –
MAINTENANCE PLAN FOR THE MISSOURI PORTION OF THE
ST. LOUIS OZONE NONATTAINMENT AREA INCLUDING
ON-ROAD MOTOR VEHICLE EMISSION BUDGETS

AND

RECOMMENDATION FOR ADOPTION

On October 28, 2004, the Missouri Air Conservation Commission held a public hearing concerning a plan revision to adopt motor vehicle emissions budgets for the purpose of conducting transportation conformity for the 8-hour ozone standard in the St. Louis, Missouri area to the Maintenance Plan for the Missouri Portion of the St. Louis Ozone Nonattainment Area. The following is a summary of comments received and the Missouri Department of Natural Resources' corresponding responses. Any changes to the proposed state implementation plan are identified in the responses to the comments.

The Missouri Department of Natural Resources' Air Pollution Control Program recommends the commission adopt the plan revision as proposed. If the commission adopts this proposed plan revision, it will be submitted to the U.S. Environmental Protection Agency for inclusion in the Missouri State Implementation Plan.

SUMMARY OF COMMENTS: No written or verbal comments were received concerning this proposed SIP revision.

	10/25/95 11/12/99	Complete-4/22/96 Complete-12/22/99	4/17/00-EPA proposed approval On 8/3/00, EPA reopened public comment period until 8/14/00							Plan will be revised to comply with the new ozone standard and transport SIP call. MACC adopted 11/8/99. On 1/19/00, DNR submitted a supplemental model report. Additional modeling submitted on 6/29/00. Presented supplemental model report to MACC at 8/31/00 public hearing. MACC adopted 9/21/00.
	11/2/00 2/28/01		4/3/01-EPA proposed approval Approved-6/26/01 (Court vacated)							On 6/26/01, EPA withdrew 3/19/01 attainment determination and approved attainment date extension to 11/15/04 and mobile source emissions budgets. On 11/25/02, U.S. 7th Circuit Court of Appeals ruled against EPA as follows: 1) EPA has no authority to grant attainment date extension; 2) 6/26/01 rule extending St. Louis attainment date vacated; and 3) directed EPA to promulgate final rule classifying St. Louis as serious ozone nonattainment area.
	12/13/02		EPA proposed to approve revised mobile budgets 1/30/03 Approved-5/12/03							Mobile 6 model released 1/29/02. Presented revised mobile budgets based on Mobile 6 model to MACC at 10/23 and 10/24/02 public hearing. MACC adopted 12/5/02.
	Missouri SIP (Emission Statement Plan)				1/15/93	6/17/94				
	1/4/94	Complete-6/17/94	Approved-2/29/96							

State Air Quality Plans Status Report

November 16, 2004

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (Redesignation Demonstration and Maintenance Plan For Missouri Portion of St. Louis Ozone Nonattainment Area)	12/5/02	12/19/02	EPA proposed approval of redesignation demonstration and maintenance plan 1/30/03. Approved-5/12/03							Presented plan and redesignation request to MACC at public hearing 10/23/02 in St. Louis and 10/24/02 in Kirksville. MACC adopted 12/5/02.
Missouri SIP (St. Louis 8 Hour Ozone Plan)	8/1/03									In 2000, DNR submitted recommendation on 8-hr nonattainment boundaries. On 6/2/03, EPA published proposed rule 8-hr Ozone NAAQS rule. On 4/15/04, EPA designated St. Louis metropolitan area as Moderate nonattainment under 8-hr ozone standard. On 6/12/04, APCP and St. Louis stakeholders met to discuss upwind NOx buffer zone and anticipated air quality improvements from NOx SIP call. On 6/16/04, MO and IL regulators held a technical meeting to develop modeling protocol and discuss modeling performance. On 7/29/04, update on 8-hr ozone modeling protocol presented to East-West Gateway Advisory Committee. On 9/23/04, Illinois EPA and Missouri hosted joint meeting to initiate St. Louis 8-hour ozone/PM2.5 SIP development stakeholder workgroups. Stakeholder workgroup meeting scheduled 11/19/04 to discuss workgroup tasks (emissions inventory, potential control measures and SIP development).
Missouri SIP (St. Louis CO Maintenance Plan)	6/13/97	Complete-7/9/97	1/26/99-EPA granted direct final approval-effective 3/29/99	No sanction clock applicable to nonclassifiable nonattainment areas.						
Missouri SIP (I/M Plan)				1/15/93	9/1/94					
	9/1/94 (Temporary rule)	Complete-9/1/94 (Contingent on Plan revision submittal of permanent rule)	EPA proposed disapproval of I/M Plan 3/18/96 due to lack of adequate resources to implement Approved-5/18/00	Sanction clock will start if EPA publishes final disapproval						A contract was awarded on 2/24/99 and testing began 4/5/00. Over 3,688,260 vehicles have been tested since the start of the program. In 2003, General Assembly did not renew appropriations for additional I/M station in South County.
	7/11/95 (Permanent rule)									
	12/9/02	12/30/02	5/12/03-EPA approved I/M rule revisions-effective 5/12/03						MACC adopted proposal for implementing OBD 4/25/02. MACC adopted rule to implement OBD 8/29/02.	
10/2/03	12/1/03							On 8/23/03, adopted revised Plan to incorporate recent rule and legislative changes.		
Missouri SIP (New Source Review Plan)				1/15/93	6/17/94					
	4/6/94	Complete-6/17/94	Approved-2/29/96

Missouri SIP (St. Joseph Light & Power SO2 Attainment Plan)	7/13/01	Complete-8/15/01	11/15/01-EPA granted direct final approval-effective 1/14/02							Consent agreement between St. Joseph Light & Power and the state to avoid SO2 nonattainment designation has been signed by all parties as of 5/25/01. Public hearing for consent agreement 2/6/01. MACC adopted 3/29/01.
Missouri SIP (Springfield City Utilities SO2 Consent Agreement)	1/2/02	Complete-2/1/02	3/25/02-EPA granted direct final approval-effective 5/24/02							Adding consent agreement to incorporate Springfield City Utilities SO2 control strategy. MACC adopted 12/6/01.
Missouri SIP (St. Louis Transportation Conformity Plan and Rule)	2/14/95	Complete-5/16/95	Approved-2/29/96							Original Plan
										Program is working on a plan revision to incorporate six federal transportation conformity rule amendments in one plan revision. Four of the six federal rule amendments are adopted into state rules. EPA combined fifth and sixth amendments into one federal rule amendment that was published in the 7/1/04 Federal Register. State rule amendment is being developed to incorporate federal changes.
Missouri SIP (Kansas City Transportation Conformity Plan and Rule)	2/14/95	Complete-5/16/95	Approved-2/29/96							Original Plan
										Program is working on a plan revision to incorporate six federal transportation conformity rule amendments in one plan revision. Four of the six federal rule amendments are adopted into state rules. EPA combined fifth and sixth amendments into one federal rule amendment that was published in the 7/1/04 Federal Register. State rule amendment is being developed to incorporate federal changes.
Missouri SIP (General Conformity Plan and Rule)	2/14/95	Complete-5/16/95	Conditional apprvl 3/11/96 with 6.300 revisions							Rule effective date is 9/30/96.
	11/20/96	Complete-2/24/97	Approved-7/14/97							
Missouri SIP (NOx RACT Plan)				7/6/94	7/3/96	1/6/96	7/3/96			
	11/30/95 (Waiver)									Submitted waiver application for sect. 182(f) of CAAA 11/30/95. EPA issued transport SIP call on 10/10/97.
	4/26/96 (Draft NOx RACT Plan) 7/1/96 (Final NOx RACT Plan)	Complete-7/3/96								A NOx RACT Plan that identifies NOx RACT as the NOx limitations required for utility boilers under Title IV acid rain program is being submitted. Public hearing for proposed plan 5/30/96. MACC adopted Plan 6/27/96.
	11/12/99	Complete-12/22/99	Approved-5/18/00							Incorporates new NOx RACT rule.

State Air Quality Plans Status Report

November 16, 2004

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (NOx Transport Plan)										On 3/3/00, court ruled on NOx SIP call petitions and removed Missouri from NOx SIP call. EPA approved statewide NOx rule 12/28/00. Proposed NOx SIP call for Missouri released 2/23/02. Comments submitted to EPA 4/29/02. On 4/21/04, EPA finalized Phase II of NOx SIP call. Missouri to submit SIP meeting full NOx SIP call by 5/1/05. Reconvened Utility Workgroup in June 2004. In July 2004, draft rule to meet new NOx SIP call requirements submitted to Utility Workgroup for review and comment. Utility workgroup meetings conducted on 10/19/04 (non-electricity generating units-EGUs) and 10/25/04 (EGUs). EGU workgroup meeting scheduled for 12/8/04.
Missouri SIP (Kansas City 8 Hour Ozone Plan)	8/1/03									In 2000, DNR submitted recommendation on 8-hr nonattainment boundaries. On 6/2/03, EPA published proposed 8-hr Ozone NAAQS rule. MACC adopted boundary recommendation 7/24/03. On 2/5/04, DNR sent letter to EPA modifying the state's recommendation to request that the Kansas City area be designated as in attainment for the 8-hr standard. On 4/15/04, EPA designated Kansas City metropolitan area as Unclassifiable for 8-hr ozone standard with a determination to be made at end of 2004 ozone season. The Clean Air Action Plan (CAAP) technical workgroup met 6/2/04, 6/16/04, 6/30/04 and 7/14/04 to discuss modeling performance, potential control strategies and modeling runs. On 8/25/04, modeling results presented to CAAP technical workgroup. On 9/10/04, MARC hosted a community workshop to present and discuss alternative strategies to achieve compliance with new 8-hr ozone standard and long term clean air. CAAP workgroup met 10/15/04 and reviewed control strategies. Workgroup is in process of prioritizing strategies for further technical evaluation. A draft Clean Air Action Plan is anticipated Jan 2005.
Missouri SIP (Kansas City Maintenance Plan)										On 2/5/96 received EPA formal notice of ozone violation (based on EPA quality assured data) in the Kansas City metropolitan area which requires contingency measures. Contingency measure recommendation presented at 8/29/96 MACC meeting.
	3/16/98	Complete-5/21/98	1/26/99-EPA granted approval (RFG incorporated by 2000) Approved-4/24/02							MACC adopted revised Plan 2/3/98. U.S. Court of Appeals struck down EPA's rule for use of RFG in former nonattainment areas. On 8/22/00, Missouri governor committed to implement 7.0 RVP gasoline, a cold cleaning solvent regulation and a pressure vacuum relief valve requirement for gasoline dispensing. Submitted RVP rule and fuel waiver to EPA on 5/21/01.
	12/12/02	Complete-12/30/02	9/16/03-EPA proposed approval Approved-1/13/04							Mobile 6 model released 1/29/02. MACC adopted subsequent 10 year plan 7/25/02. MACC adopted revised mobile budgets 12/5/02. On 6/5/03, EPA informed public that revised motor vehicle emission budgets are adequate for conformity purposes.

State Air Quality Plans Status Report

November 16, 2004

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Title V Operating Permit Plan (Although not a SIP, has similar requirements and impacts)				11/15/93	3/2/95					
	1/13/95	Complete-3/2/95	4/11/96-EPA granted final interim approval of operating permit program Approved-5/14/97							Operating Permit Program effective date is 5/13/96. Full approval effective 6/13/97.
	5/6/03	Complete-5/22/03	9/17/03-EPA granted direct final approval-effective 11/17/03							On 3/25/02, EPA issued Notice of Deficiency for the Operating Permit Program because some state requirements do not comply with CAA and 40 CFR 70 requirements. MACC adopted plan revision and rule change on 12/5/02.
										Program is working on a plan revision to streamline the Basic and Intermediate Operating Permits to minimize the workload for both industry and program staff while maintaining ambient air quality standards. As result of stakeholder review, a rule variance was approved by MACC and rule amendments are being developed to implement operating permit program streamlining.
Missouri SIP (Glover Lead Plan - Doe Run/ formerly ASARCO)	8/13/96	Complete-9/18/96	Approved-5/5/97	8/2/93	9/18/96	2/2/95	9/18/96	8/2/95	9/18/96	Air quality monitoring data continues to show lead standard attainment after controls installed. Amended consent decree was filed in Sept' 99.
	7/31/00	Complete-9/5/00	12/5/01-EPA proposed approval. Approved-4/16/02							Plan being revised to change ownership via new consent decree. MACC adopted plan revision 5/25/00.
	1/26/04		6/30/04-EPA proposed approval effective 8/30/04 unless adverse comments received by 7/30/04 Direct final rule withdrawn 8/24/04 due to adverse comment 10/29/04 - EPA granted direct final approval - effective 11/29/04							On 12/1/03, Glover smelter ceased operations with plans to reopen in future. DNR advised that certain emission compliance and reporting requirements of maintenance plan could be discontinued until plant is restarted. DNR monitoring will be discontinued at the end of June 2004 but the ability to restart monitoring with sufficient lead time will be retained should the plant begin smelting again. On 10/29/04, EPA published final rule to address adverse comment, redesignate area to attainment for lead and approve maintenance plan.
Missouri SIP (Herculaneum Lead Plan - Doe Run)				1/4/94	12/15/94					
	6/3/91 7/2/93 6/30/94 11/23/94	Complete-7/9/91 Complete-9/30/93 Complete-2/23/94 Complete-12/15/94	Limited approval 3/6/92 Full approval on all 4 submittals together on 5/5/95							Area failed to attain lead standard 3rd quarter 1995. All contingency measures were implemented and still failed to attain lead standard.
	1/9/01	Complete-1/18/01	12/5/01-EPA proposed approval. Approved-4/16/02	7/28/99	1/18/01					MACC adopted plan revision and lead rule 12/7/00 and court signed consent judgement on1/5/01. For 3rd quarter 2004, Main Street monitor measured 1.416 ug/m3.

Missouri SIP (Doe Run Resource Recycling Division Lead Plan)				1/4/94	12/15/94					
	7/2/93 6/30/94 11/23/94	All three submit-tals together found complete 12/15/94	All three submit-tals together approved 8/4/95							Eight continuous quarters of lead standard attainment.
	5/12/00	Complete-8/2/00	10/18/00-EPA granted direct final approval-effective 12/18/00							Facility now referred to as Doe Run Resource Recycling Division and is located near Bixby, MO.
	4/29/03	Complete-8/13/03	8/24/04-EPA granted direct final approval-effective 10/25/04							Plan being revised to update emission limits to reflect current operation of facility. Public hearing for plan revision and rule change 10/24/02. MACC adopted 12/5/02.
Missouri SIP (Update outdated local codes/ ordinances)	3/12/97	Complete-4/24/97	4/22/98-EPA granted direct final approval-effective 6/22/98	Sanction clock not applicable.						Required to comply with Title V Program.
	12/22/98	Complete-4/14/99	12/22/99-EPA granted direct final approval-effective 2/22/00							Updated Kansas City local incinerator codes.
	5/22/00	Complete-6/15/00	10/26/00-EPA granted direct final approval-effective 12/26/00							Revised to reflect new St. Louis City ordinance 64749.
	10/15/03	11/6/03	12/9/03-EPA granted direct final approval-effective 2/9/04							Plan being revised to reflect new St. Louis City ordinance 65645. Public hearing for plan revision 7/24/03. MACC adopted 8/28/03.
111(d) Plan-Municipal Solid Waste Landfills	1/26/98		4/24/98 - EPA granted direct final approval-effective 6/23/98							Original Plan
	8/31/00	Complete-9/21/00	11/15/00 - EPA granted direct final approval-effective 1/16/01							Plan being revised to reflect recent EPA Emission Guidelines revisions. Public hearing for plan revision 6/29/00. MACC adopted 7/27/00.
111(d) Plan-Hospital, Medical/Infectious Waste Incinerators	6/15/99		8/19/99 - EPA granted direct final approval-effective 10/18/99							Original Plan
	7/13/01		10/12/01 - EPA granted direct final approval-effective 12/11/01							Plan being revised to assure consistency with federal definitions. Public hearing for plan revision 2/6/01. MACC adopted 3/29/01.

State Air Quality Plans Status Report

November 16, 2004

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (Revised NAAQS Plan)										<u>Ozone</u> Continuing to monitor 8 hour ozone standard. On 7/11/00, DNR sent letter to EPA recommending Kansas City and St. Louis be designated nonattainment for 8 hour ozone standard. On 2/27/01, U.S. Supreme Court upheld revised NAAQS. On 3/26/02, U.S. Appeals Court, D.C. Circuit upheld revised NAAQS. On 6/2/03, EPA published a proposed rule to implement the 8-hour Ozone NAAQS. On 4/30/04, EPA published Phase I of 8-hour ozone NAAQS implementation rule with Phase II to be published in next several months. Latest Section 110 Plan commitment letter submitted to EPA 9/27/04.
										<u>PM_{2.5}</u> Continuing to monitor PM _{2.5} . On 2/27/01, U.S. Supreme Court upheld revised NAAQS. On 3/26/02, U.S. Appeals Court, D.C. Circuit upheld revised NAAQS. Latest Section 110 Plan commitment letter submitted to EPA 9/27/04. EPA developing implementation plan.
Missouri SIP (Regional Haze Plan)										Final federal regional haze rule published 7/1/99 and Plan schedule is dependent on new NAAQS issues. Tasks completed: previous years grant applications (EPA approved), RPB structure/budget, by-laws, articles of incorporation, individual workgroup plans, guidelines for workgroup chairs, and FY2003 grant application. On 12/12/01, EPA released draft guidance to implement regional haze rule published 7/1/99. On 5/24/02, the D.C. Circuit Court of Appeals ruled on a case challenging specific BART requirements and will affect the way BART will be applied. Leanne Tippet appointed to Policy Oversight Group. Attended CENRAP workgroup meeting 8/11–8/13/03 in Minneapolis, MN and 8/2-8/4/04 in Kansas City, MO. On 11/15/04, BART survey sent to industries in order to determine affected BART sources. For individual workgroup progress, see www.cenrap.org. See Attachment A for schedule timeline.

State Air Quality Plans Status Report

November 16, 2004

Plan Commitment	Plan Submitted to EPA *	EPA's Plan Completion Finding *	EPA's Plan Approval Finding *	Sanction Clock Date **		Sanctions				Comments
						EPA Impose 2:1 Emissions Offset Ratio (18 mos after clock start)		EPA Withholds Highway Funds (24 mos after clock start)		
				Start	Stop	Start	Stop	Start	Stop	
Missouri SIP (Small Business Stationary Source Technical and Environmental Compliance Assistance Program)	3/10/93	Complete-5/11/93	Approved-3/10/93							This program is being implemented and operated by the Outreach and Assistance Center (OAC) environmental assistance office. Senate minority leader appointment seat is vacant.

Note: Shaded blocks indicate changes or additions from the previous report.

- * Failure to meet any of these dates or plan requirements, starts the 18 month sanction clock.
 If requirement is not met within 18 months, the 2:1 emissions offset ratio sanction is imposed.
 If requirement is still not met within 24 months, the sanction that withholds highway funds is imposed.

- ** Sanction clock starts with 1) EPA letter to Governor for failure to submit or finding of incompleteness; or 2) EPA Federal Register final notice of plan disapproval or nonimplementation.
 Sanction clock stops with EPA letter to department director of finding of completeness.

**RECOMMENDED ORDER
OF DISMISSAL**

On November 5, 2004, Petitioners filed a Notice of Dismissal stating that the parties have entered into a settlement agreement.

Therefore, the Hearing Officer recommends that the Missouri Air Conservation Commission issue a final order dismissing the case.

SO RECOMMENDED on November 10, 2004.

JUNE STRIEGEL DOUGHTY
Hearing Officer

MEMORANDUM

DATE:

TO: Missouri Air Conservation Commission

THROUGH: James D. Werner, Director
Air and Land Protection Division

FROM: Leanne Tippet Mosby, Director
Air Pollution Control Program

SUBJECT: Cotton Gin Construction Permitting Variance Request

The Department of Natural Resources' Air Pollution Control Program is requesting the Commission grant a variance from construction permitting for all permitted cotton ginning installations through the current cotton season, which ends approximately February 2005. Missouri Regulations currently require installations to apply for and obtain a construction permit for increases in production that result in an increase in air emissions.

The existing regulation, 10 CSR 10-6.060(1)(B), *Covered Installations/Changes*, states "This rule shall apply to installations throughout Missouri with the potential to emit any pollutant in an amount equal to or greater than the de minimis levels. This rule also shall apply to changes at installations which emit less than the de minimis levels where the construction or modification itself would be subject to section (6), (7), (8) or (9) of this rule."

The Program has record of 34 cotton ginning installations in Missouri, located mainly in the southeastern part of the state. Most of the installations have construction permits with a limitation on the number of bales of cotton they can process per year. The apparent intention of the bale limitation in the permits was to limit emissions to less than 15 tons of particulate matter with a diameter of less than 10 microns (PM₁₀). The 15 tons per year emission estimate is based on engineering calculations that use emission factors developed by the Environmental Protection Agency for cotton gins and process throughputs. By limiting emissions to less than 15 tons of PM₁₀, the installations are not required to perform air dispersion modeling or a screening analysis to determine the impact on air quality standards.

Cotton Gin Variance Request
Page Two

Currently, due to ideal weather conditions during the growing and harvesting season, a record amount of cotton has been produced across the nation this year. As a result, cotton ginning installations in Missouri are fast approaching and in some cases have surpassed bale limitations placed on them through these past construction permits. In order to increase the number of cotton bales produced and therefore increase emissions of PM₁₀; these installations are required to submit a construction permit modification. However, due to the limited time frame dictated by the short harvesting season and the inherent complexity of performing air dispersion modeling for cotton gins, the Air Pollution Control Program analyzed this situation for the 2004 cotton ginning season. The Program notified the cottons gin installations that we would not take enforcement action for exceeding production limits to allow for increased need for cotton processing. Based on our conversations with a few ginning operations, we estimate each installation will increase the number of bales processed by no more than 10,000 bales over permitted limits. This equates to a maximum of approximately 7 tons of PM₁₀ emissions per installation. Overall, the Air Pollution Control Program anticipates that each cotton gin installation will have less than 50 tons of PM₁₀ potential emissions this year.

Although the level of emissions proposed for each cotton gin would trigger an air quality analysis if reviewed under construction permitting regulations, the Air Pollution Control Program believes that the level of emissions from these cotton gins will not cause an air quality concern or an adverse health risk. The Program believes that the cotton gins, with the new temporary levels, will still be in compliance with the ambient air quality standards for PM₁₀.

The Air Pollution Control Program is basing this assumption on a study performed by the State of New Mexico. Currently, New Mexico is proposing new regulations for cotton gins that emit less than 50 tons per year of PM₁₀. The proposed regulations are based on a study conducted by the New Mexico Environment Department using data from a local cotton gin and the U.S. EPA recommended air dispersion model (ISCST3). The study demonstrated that for cotton gins located more than 300 feet from the property boundaries with control equipment on all exhaust streams, National Ambient Air Quality Standards were not exceeded.

The Air Pollution Control Program recommends granting this variance from construction permitting requirements for cotton ginning installations until February 2005. The Air Pollution Control Program intends to investigate and determine a permanent solution to this issue prior to the next harvest season. For more details and background, please refer to the document titled, "Missouri Department of Natural Resources' Recommendation to the Missouri Air Conservation Commission on Granting a Variance to Cotton Gin Installations."

LTM/kml

c: Tim Duggan, Attorney General's Office

Missouri Department of Natural Resources' Recommendation to the Missouri Air Conservation Commission on a Granting a Variance To Cotton Gin Installations

Introduction

The Department of Natural Resources' Air Pollution Control Program is requesting the commission grant a variance from the Missouri Air Pollution Control Program Regulation 10 CSR 10-6.060, Construction Permits Required. The department is submitting the variance petition to the Missouri Air Conservation Commission (Commission) for action at its meeting on December 9, 2004, pursuant to Section 643.055 and 643.110, RSMo.

Missouri Regulations currently require installations to apply for and obtain a construction permit for increases in production that result in an increase in air emissions. The Air Pollution Control Program is requesting a variance from this construction permitting requirement for permitted cotton ginning installations during the current cotton season.

If the Commission grants the variance petition, Missouri cotton gins installations would be allowed to increase production for the 2004 ginning season without first obtaining a construction permit.

Background

The existing regulation, 10 CSR 10-6.060(1)(B), *Covered Installations/Changes*, states "This rule shall apply to installations throughout Missouri with the potential to emit any pollutant in an amount equal to or greater than the de minimis levels. This rule also shall apply to changes at installations which emit less than the de minimis levels where the construction or modification itself would be subject to section (6), (7), (8) or (9) of this rule."

The program has record of 34 cotton-ginning installations in Missouri, located mainly in the southeastern part of the state. Most of the installations have construction permits with a limitation on the number of bales of cotton they can process per year. The apparent intention of the bale limitation in the permits was to limit emissions to less than 15 tons of particulate matter with a diameter of less than 10 microns (PM₁₀). The 15 tons per year emission estimate is based on engineering calculations that use emission factors developed by the Environmental Protection Agency for cotton gins and process throughputs. By limiting emissions to less than 15 tons of PM₁₀, the installations are not required to perform air dispersion modeling or a screening analysis to determine the impact on air quality standards.

Currently, due to ideal weather conditions during the growing and harvesting season, a record amount of cotton has been produced across the nation this year. As a result, cotton-ginning installations in Missouri are fast approaching and in some cases have surpassed bale limitations placed on them through these past construction permits. In order to increase the number of cotton bales processed, and therefore increase emissions of PM₁₀, these installations are required to submit a construction permit modification. However, due to the limited time frame dictated by the short harvesting season and the

inherent complexity of performing air dispersion modeling for cotton gins, the Air Pollution Control Program is requesting a variance from construction permitting requirements for cotton gin installations for this cotton ginning season. Based on our conversations with a few ginning operations, we estimate each installation will increase the number of bales processed by no more than 10,000 bales over permitted limits. This equates to a maximum of approximately 7 tons of PM₁₀ emissions per installation. Overall, the Air Pollution Control Program anticipates that each cotton gin installation will have less than 50 tons of PM₁₀ potential emissions this year.

The Commission may grant a variance, pursuant to state law (Section 643.055 and 643.110, RSMo), if certain conditions are met. The department has reviewed each of these conditions and compared them with the facts of this case. These two statutes authorize the Commission to grant a variance if the person applying for the variance can show that compliance with the rule:

1. “would cause economic hardship” (643.055.2(1), RSMo);
2. “is physically impossible” (643.055.2(2), RSMo);
3. “is more detrimental to the environment than the variance would be” (643.055.2(3), RSMo);
4. “is impractical or of insignificant value under the existing conditions” (643.055.2(3), RSMo);
5. “will result in taking of property without just compensation” (643.110.1, RSMo); or,
6. “[will result] in the closing and elimination of any lawful business, occupation, or activity, without sufficient corresponding benefit or advantage to the people” (643.110.1, RSMo);

The Air Program staff believes that compliance with the construction permit rule during this record cotton harvesting season would cause an economic hardship by forcing cotton gins to either suspend cotton ginning or take the harvested cotton to neighboring states that do not have the same permitting requirements as Missouri.

The two statutes do not authorize the Commission to grant a variance:

7. “where the effect of the variance will permit the continuance of a health hazard” (643.110.1, RSMo); and
8. “that any variance so granted shall not be construed to relieve the person who receives the variance from any liability imposed by other law for the commission or maintenance of a nuisance.” (643.110.1, RSMo)

The Air Program staff believes that allowing cotton ginning installations to increase production by approximately 10,000 bales of cotton per year would not constitute a

continuance of a health hazard or relieve the person from any liability imposed by other law for the commission or maintenance of a nuisance.

Recommendation

In order to address this unexpected cotton harvest, the Department of Natural Resources' Air Pollution Control Program is requesting the commission grant a variance from construction permitting for all permitted cotton ginning installations through the current cotton season, which ends approximately February 2005.

Although the level of emissions proposed for each cotton gin would trigger an air quality analysis if reviewed under construction permitting regulations, the Air Pollution Control Program believes that the level of emissions from these cotton gins will not cause an air quality concern or an adverse health risk. The program believes that the cotton gins, with the new temporary levels, will still be in compliance with the ambient air quality standards for PM₁₀.

The Air Pollution Control Program is basing this assumption on a study performed by the State of New Mexico. Currently, New Mexico is proposing new regulations for cotton gins that emit less than 50 tons per year of PM₁₀. The proposed regulations are based on a study conducted by the New Mexico Environment Department using data from a local cotton gin and the U.S. EPA recommended air dispersion model (ISCST3). The study demonstrated that for cotton gins located more than 300 feet from the property boundaries with control equipment on all exhaust streams, National Ambient Air Quality Standards were not exceeded.

Pursuant to 643.055 and 643.110, RSMo, the Air Pollution Control Program recommends that the Commission grant this variance from construction permitting requirements for cotton ginning installations. The effect of this variance will be to allow Missouri cotton gins to accommodate the record cotton growth this season. The Air Pollution Control Program intends to investigate a permanent solution to this issue for future cotton seasons.

By order of the Missouri Air Conservation Commission, the above recommendation is hereby approved on this 9th day of December, 2004.
